FIS TMS Partnership RFP

Workshop 1: Vendor Credentials & Proposals for Commercial Model

31st March 2026

© 2026 Cognizant

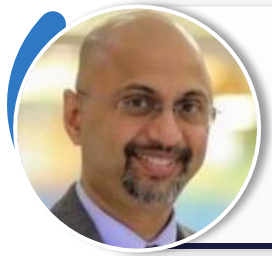
Meet Your Transformation Partners: Expertise That Delivers Results

"This is the team that will be with FIS from Day 1, not just during the proposal phase."

Nitin Bahl
Strategic Business Unit Head – Financial Services and Fintech

Binesh Nambiar
Global Head, Financial Services Operations

Stephanie Wan
Head - AI-Powered Digital Experience



Shanker Udyaver
Global Head of Technology Consulting

Mohit Bhatia
Head - Banking and Capital Markets Operations

Angela Black
Global HR Head, Large Transformation Program

Krishanu De
Head – Payments, Risk and Compliance Solutions

Prashant Prabhakar
Global Client Partner

Sarath Sethumadhavan
Client Partner

Neil Bhandar
Executive Program Director - AI

Fakrudeen Ali Ahamed
Contact Centre Lead

Agenda

01 **Our credentials overview**

02 **Our solution caters to your requirements**

- Key solution design principles
- Proposed solution summary

03 **Commercial overview**

04 **Our vision to transform FIS TMS**

- Experience led lens to transformation
- Five-year transformation rollout view
- Productivity improvement drivers
- Our approach to transforming TMS CX and delivery

05 **People, location and transition solution**

- Workforce Rebadging
- Location strategy
- Waved approach to Client Migration

06 **Example for similar transformation engagements**

07 **Question & Answer (Q&A)**

 © 2026 Cognizant

Success will depend upon finding a partner who has the right attributes to match your ambition

Scale

Does my partner have the scale to match the size of my ambition?

- **350K+ associates** across **50+ countries**
- **Top-5** global BPO provider with **94K+** associates
- **600+ BFSI** and **50+ Fintech clients**

Domain Knowledge

Does my partner understand my business?

- **29 years of Cards & Payments** domain experience (Operations and Technology)
- FIS/TSYS **domain experience**

Transformation

Does my partner have the capability to help me transform?

- **$2.5B investment in AI** since 2020
- AI platforms driving **hyper-productivity, AI industrialization** and **enterprise Agentification**
- **State-of-the-art AI Labs** with **65 patents**

Experience

Has my partner helped other customers in a similar journey?

- **450M+ savings delivered** over the last 12-18 months in financial services
- **400+ successful transitions** in the last 4 years
- Rebadging track record with **95% acceptance** across **91K+ roles and strong retention**

Trust

Is my partner vested in my success?

- Proven **executive-level commitment**
- **Proven delivery track record** in FIS as a preferred partner
- **True risk-sharing** with guaranteed savings and contractual accountability
- **360-degree partnership** with FIS

Cognizant Modern Operations Overview

*Our competitive advantage has been in **understanding these industries' domain requirements and designing operations***

94K+ Associates

230+ Clients

25+ Languages

30+ Global Centers

Financial Services

- **99% of all US residential property** data digitized
- **$125B+ Insurance premiums** managed
- **150B** Daily settlements across asset classes

Communications, Media and Technology

- **500K** Points of interest digitally mapped
- **$4B Digital Marketing** spend managed

Health Sciences

- **10M** Lives managed
- **30M** Enrollment transactions
- **8** Therapeutic Areas; Accounting for 95% of Drugs

Products & Resources

- **$55B** Order revenue management for food services
- **450K** B2B customers managed

Enterprise Automation | **Customer Experience Management** | **Digital Finance** | **HR Shared Services**

Data Analytics | **Digital Marketing** | **Legal & Compliance** | **AI Training Services**

Everest Group PEAK MATRIX Leader

- CX Services - Insurance Operations

We have proven success stories matching your goals

Leading US Financial Services Provider

End-to-end contact center transformation powered by cloud-native CX and conversational AI

- Partnered with a Tier-1 US bank to modernize its legacy Avaya contact center into a scalable, cloud-based Amazon Connect platform for **8000 agents**.
- Executed zero-disruption migration of **24 LOBs** from incumbent vendor environments to AWS Cloud.
- Designed and deployed Conversational IVR using Amazon Lex V2 with multi-language support
- Implemented advanced fraud detection using Pindrop voice biometrics and real-time authentication services.
- Enhanced speech recognition and NLU accuracy through CX analytics–driven tuning, utterance cleanup, and slot expansion.
- Integrated NICE IEX, NICE Nexidia for workforce optimization, analytics, and backend orchestration.
- Delivered measurable business outcomes including: **77% call containment rate, $15M cost savings, 66% CSAT, ~24% improvement in transfer rate**

Largest Canadian multinational financial services company

End-to-end process re-engineering powered by digital assistants for high-volume operations.

- Seamlessly **took over operations from a long-standing incumbent (10-year relationship)** through a zero-disruption vendor-to-vendor transition
- Scaled delivery with **800+ FTEs supporting end-to-end banking operations**
- **Re-engineered core processes** and deployed **Digital Assistants through iterative automation sprints** across volume-intensive workflows
- Delivered a structured **transformation roadmap** spanning migration, handover, and platform modernization
- Ensured **post-migration data integrity, accuracy, and complete customer record transfer**
- Achieved **2.6M zero-touch transactions**, driving **~90% zero-touch processing** across eligible volumes

Global tech giant

AI-led fraud detection and investigation at scale across high-volume, multi-market payment ecosystems.

- Enabled **end-to-end fraud detection and investigation** across key digital payment and account-creation journeys
- Scaled delivery with **1300+ associates**, supported by **Tier-2 global workflows across APAC and EMEA**
- Implemented **agent-assist DSS, real-time alerts, and Zero-Surprise FMEA** to improve investigation accuracy and consistency
- Built a **GenAI-enabled knowledge platform** for real-time agent decisioning in a **24×7 model**
- Prevented **300K+ probable fraud transactions** over 12 months through proactive detection
- **~10% productivity & quality improvement**, **~20% AHT reduction**,
- **AI-ML accuracy uplift from 93% to 99.7%**

Key solution design principles to achieve the intended outcomes

CURRENT STATE OBSERVATIONS

73.6%

IVR containment — US

Strong vs ~60% industry baseline; EMEA at **~39%** shows high improvement headroom

US: strong | EMEA: gap

~54%

Avg. occupancy rate

US ~60%, EMEA ~48% — both below 80% industry average

Benchmark: 80%

+42%

Back-office dispute surge

Q4 spike driven by NA-3 and NA-1; signals strong case for disputes automation

Q4 spike | NA-3 · NA-1

SLA risk

Multiple clients below threshold

SLA breaches directly impacting revenue and client experience

Revenue impact

High-cost location

With low fully loaded cost

Combination may lead to client and agent experience issues

Operating model-constrained

Flat vol.

Volumes year-round

No seasonal spikes — predictable load enables automation planning

No seasonality

PROVOCATIONS AND CONVICTIONS FOR SOLUTION DESIGN

Provocations	Convictions
P1- **Right location strategy** not based on cost but based on contracts, regulation, language and nature of work	• Location design is traceable back to a rule • Answer is 7 locations 16 tower model
P2- **Would location strategy alone solve the puzzle**	• No, the solution is transformation led complemented by location strategy
P3- The **40% Onshore** Is Not a Concession — **It Is the Foundation**	• Map functions to locations, not locations to headcount. • 996 FTEs stay onshore — 227 at Columbus GA and 769 at MK/Coventry • Rebadge to Cognizant on Day 1 at FIS's own facilities • Zero hiring lag, zero knowledge loss, zero client disruption
P4- Applying a **one-size-fits-all** model?	• Two regions. Two distinct strategies by design. • NA: scale and optimize • EMEA: comply, then transform and then transition

 © 2026 Cognizant

Proposed solution summary

2,490 FTEs Migrating 2,678 minus 188 exits	**996** Onshore · 40% UK- 769 + Columbus- 227	**370** Nearshore · 15% Bucharest · Halifax · El Salv	**1,124** Offshore · 45% Manila + Coimbatore	**188** Exits Client deconversion

Cognizant Solution Response

Proposed Approach – Prioritize stabilization and rebadging first, then layer AI and automation in parallel - achieving the target operating model by Month 24

Base Camp 1.0 (Month 0 to 12)

People & Delivery

- 2,490 in-scope FTEs (2678 FTEs minus 188 FTEs for deconversions/ client exits)
- ~1000 FTE rebadge in NA and UK on Day-1
- 100% Work-From-Office during transition

Location Model (Day-1 safe landing)

- Onshore: Columbus GA, MK/Coventry UK
- Nearshore: Halifax CA, Bucharest RO, El Salvador
- Offshore: Manila PH (Voice), Coimbatore IN (Non-Voice)

Outcome

- Service continuity protected
- Institutional knowledge retained
- Cognizant assumes full delivery accountability

Base Camp 2.0 (Month 6 to 24)

AI & Automation Overlays

- IVR Containment uplift (74% → 85%)
- Fraud ML auto-decisioning (0% → ~55%)
- Improved STP for disputes & back office
- AI QA auto-scoring and agent assist
- Guided processing for case workflows and process automation

Operating model evolution

- Voice stabilized first → Non-Voice optimized next
- Progressive FTE reduction driven by productivity, not attrition
- Embedded governance and value tracking

Outcome

- Measurable productivity uplift
- Reduced AHT, higher FCR, lower call volumes
- Risk-controlled automation rollout

Summit : Target Operating Model (by M24)

Shared Service Utility -FIS TSYS End State

Consolidated Service Engine | AI-Enabled Operations

TSYS TS2 / FDS / Avaya AAEP (core) | Cognizant AI180° overlays | Reporting & analytics self-serve

Strategic Outcomes

- ~40+% structural FTE reduction by year 4
- Platform ready for issuer growth and new client onboarding

© 2026 Cognizant

Commercial Overview

- Commercial design principles
- Commercials Summary
- Summary of vendor costs and investments

 © 2026 Cognizant

Commercial design principles

Outcome-Led Value Creation
Commercials tied to milestones, not FTE headcount. Pricing blends fixed fee and transaction-based models by process type.

Risk–Reward Alignment
Upside and downside shared equitably. Cognizant bears delivery risk; rewards index to sustained outcome achievement.

Baseline Transparency & Measurability
Outcomes benchmarked against mutually agreed baselines with clear measurement and governance. Gain-share model activates if productivity gains exceed underwritten commitments.

Scalability & Volume Elasticity
Pricing flexes with volume spikes, seasonality, and client changes — unit economics scale without penalizing either party.

Built-in Continuous Improvement
Fixed price embeds year-on-year productivity gains funded by automation, re-engineering, and AI — compounding value over the contract term.

Financial Engineering
Cognizant's balance sheet absorbs upfront investment to deliver year 1 P&L savings without passing capital costs to FIS.

Long-Term Partnership Orientation
Commercial construct prioritizes sustained value over short-term cost reduction, reinforcing Cognizant's role as a strategic transformation partner.

~$195 Mn

Total 5-year savings vs FIS/ TMS current baseline

~$25 Mn

Cognizant–funded Investments
Transition + change management + tooling + operational buffer, at No cost to FIS

 © 2026 Cognizant

Commercials Summary

Delivering **commercial value to FIS** through a pragmatic solution that accounts for client-specific constraints on offshoring and outsourcing, while maintaining the right balance between speed of execution and cost optimization.

Day-1 rebadge	Economics	Investment	Year 1 positivity
~1,000 FTEs (UK & NA) from existing sites; +1,490 FTEs transitioned in 4 waves by M12	**~$195M** net savings over 5 years driven by **~41%** productivity uplift (process, automation, Agentic AI)	**~$25M** for transition, PMO, tooling, buffer, and performance reporting	Commercial levers applied for P&L positivity from Year 1

Spend Category/ Spend (in Mn.)	Y1	Y2	Y3	Y4	Y5	Total (in Mn.)
A. Current Operating Expense	**144.2**	**147.1**	**150.1**	**153.1**	**156.1**	**750.6**
B. Spend with Cognizant (1+2+3+4)	**87**	**124.1**	**111.5**	**88.63**	**88.72**	**499.89**
1. Operations	103.4	120.3	102.88	90.31	90.41	**507.29**
2. Transformation	6.35	4.31	3.28	3.28	3.28	**20.5**
3. Volume Discount	(5.69)	(6.62)	(5.66)	(4.97)	(4.97)	**(27.9)**
4. Billing Adjustment	(17.11)	6.11	11			**(0)**
C. Retained FIS Cost	55.3	-	-	-	-	**55.3**
D. Overall FIS TCO (B+C)	**142.24**	**124.1**	**111.5**	**88.63**	**88.72**	**555.19**
Savings for FIS (A- D)	**2**	**23**	**38.67**	**64.4**	**67.4**	**195.4**
Savings %	**1.4%**	**15.6%**	**25.7%**	**42.1%**	**43.2%**	**26.04%**

$195m saves over 5 years

As requested, Tech stack migration cost from TMS to FIS is estimated to be $5.2m and has not been factored in the above business case.

 © 2026 Cognizant

Summary of vendor costs and investments across the program

Cognizant's Investment Commitment — $25M+ in Program Enablement

Transition & Knowledge Transfer ~$16M	Dedicated transition PMO, structured KT bootcamps per LOB wave, and a shadow-and-certify model ensuring zero service degradation on go-live. All transition costs of 6 weeks will be absorbed by Cognizant ,no day-rate billing during this period of knowledge transfer.
Technology & Tooling ~$3M	Proprietary accelerators deployed at no additional license cost: workflow automation, real-time ops dashboards, SLA tracking, anomaly detection, and reporting suite. Pre-built integrations with FIS platforms (TS2, DMS, FDS) reducing stand-up time and integration risk.
Offshore Buffer Capacity ~$6M	**(5% dedicated buffer)** A pre-funded 5% offshore capacity buffer held in reserve across Manila and Coimbatore absorbing volume spikes, attrition cover, and ramp risk without impacting contracted SLAs or triggering change orders.
Total Cognizant Investment: ~$25M	*This is not a cost passed to FIS. It is Cognizant's committed investment in making this engagement a success.*

Leverage Cognizant's larger investment of approx. $2.5 billion in Gen AI capabilities

Access to Bluebolt™ Program employee idea-sharing + Access to our strategic partners + Dedicated Process Excellence + Transformation Office = Continuous Improvement & Innovation

By bringing an experience-led lens to this transformation, we aim to unify the operational and tech transformation for productivity goals and growth with AI

Productivity
via AI-enabled tech transformation

Customer self-service experiences

- Create self-service journeys that feel intentional and helpful—not like deflection.
- Reduce customer effort while improving containment and resolution quality.

Re-imagination / Optimization

- Workflow redesign to drive efficiency
- Re-imagination of how work is executed

Contact Center Agents Experience

- AI-supported agent experiences (dashboards, unified views, SOP prompts, guided workflows).
- Improved FCR, AHT, quality, compliance, and fraud-handling efficiency.
- Reduce noise and variability during dual-run and transition periods

Momentum

Growth and Client Retention
via modernization & data-driven insights

Cross-sell and upsell journey design (B2B2C) — leverage the now-stable, low-friction service experience to introduce revenue-generating moments

- Service-embedded card feature activation nudges
- Premium servicing tiers for high-value issuer programs
- Digital tool adoption programs that unlock additional platform revenue

Experience blueprints for new client expansion (B2B)

- Incremental Scope Capture Through Service-Triggered Add-On Operations

© 2026 Cognizant

5-year Transformation Rollout Plan: An overview of experience led hyper automation implementation plan

As we transition and stabilize the processes, we will commence implementing a range of transformation initiatives across process standardization, optimization, increased automation and best-in-class management reporting & insights

 © 2026 Cognizant

Solution Levers driving productivity improvements…

Domains	Solution Levers	Description	Efficiency %
Tier 1 – Customer Service Tier 2 – Risk Mitigation Back Office	**Effective workforce management**	Improve utilization, Cross-training & multi-skilling, real-time performance monitoring, intelligent workforce management	12%
	LSS Projects to enhance efficiencies	Process standardization through Value stream mapping and lean projects	
	Optimize agent performance	Bottom quartile management & targeted coaching to reduce inter operator variability	
	Hands-off and knowledge Management	Knowledge transfer between FO & BO to reduce touch points, TAT and improved CX	
	Metric Measurement	Adopting balanced scorecard approach / Generate insights through FLM dashboards	
	Low Code Automation	Quick shortcut keys to improve repetitive tasks and eliminate NVA's	
	AI powered Agent Assist	GenAI powered by Agent Assist – Sentiment & Interaction Analytics	22%
	Conversational IVR	AI powered intelligent self-service driven interaction across voice channel	
	Chatbot	AI powered proactive chat-based interactions on web channel	
	Gen AI Knowledge Assist	Gen AI Knowledge Assist Tool to provide recommendations and next best actions	
	GEN AI based fraud detection system	Fraud detection process enhancement	
	Improved Operations	Total Case Ownership and structured Service Quality Management	7%
	Empowered Users	Persona-driven, Self-Help platforms to drive adoption of ChatAI and VoiceAI	
	AI and Automation	Workflow Automation, BOT and Script libraries, GenAI-powered solutions	
	Stability and reliability	Process standardization and OCM, including Left Shift & self-healing automation	

Typical Outcomes

- ↓ **Learning curve and training ~10%**
- ↑ **CSAT improvement ~7%**
- ↑ **Containment Rate ~12%**
- ↓ **Average Handle time ~20%**
- ↑ **First call Resolution ~8%**
- ↓ **Customer escalation ~5%**
- ↑ **Agent experience ~15%**
- ↓ **After call work / Abandonment ~25%**
- ↓ **Total Cost of Ownership**
- ↑ **Forecasting Accuracy ~10%**
- ↑ **BCP, Business resilience**
- ↑ **Traceable, repeatable digital trail; Audit ready**

% Potential Impact	Y1	Y2	Y3	Y4	Y5
	3%	22%	38%	41%	41%

© 2026 Cognizant

Logical Capability Architecture

- Operates on existing TSYS TS2, FDS, Avaya AAEP, and NICE Actimize from Day 1, no re-platforming, no SLA disruption
- NICE CXOne connects all assisted channels to TSYS TS2, FDS, and CRM via standard APIs across all service lines
- Shared AI agents overlay existing platforms with zero core platform changes required to realize savings
- AI activated by line of business: Customer Service at 40%+ coverage, Fraud at 50%+ ML auto-decisioning, Disputes at 60%+ straight through processing
- Fully compliant from go-live: PCI-DSS L1, GDPR, BaFin, FCA, ISO 27001, SOC 2 Type II, and DORA covered simultaneously

 © 2026 Cognizant

Our approach to transforming TMS CX and delivery

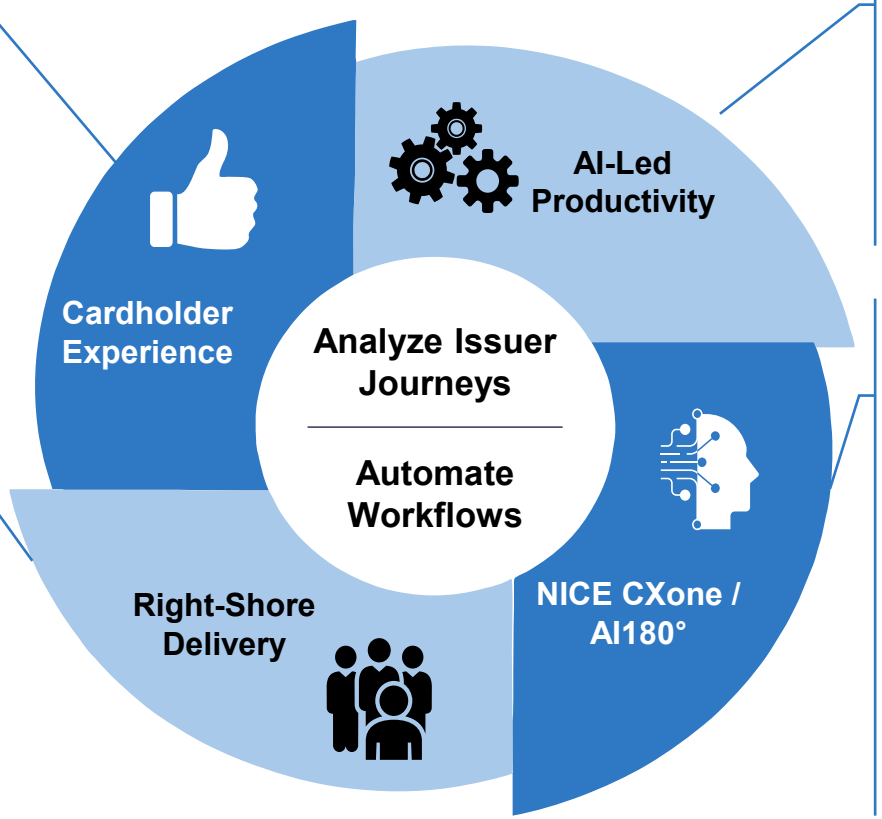
Key focus areas to drive productivity, experience, and growth for FIS issuers

- IVR Containment
- AI Automation
- Gen AI Assist
- Agent Productivity
- Cardholder CX
- Fraud ML

Dual mandate: savings + growth

- Map cardholder journeys across 60 issuer clients
- Omni-channel: Voice, Chat, SMS, IVR, Secure Messaging
- 360° view via unified agent desktop (TS2, FDS, CRM)

- Conversational IVR: containment 73% → 85% (NA)
- Gen AI Knowledge Assist for next best action
- AI QA auto-scoring and sentiment analytics
- Skills-based routing via NICE CXone



- Day-1 rebadge ~1,000 FTEs (UK and NA)
- 4-wave transition: 2,490 FTEs across 7 sites
- Right-shoring: onshore / nearshore / offshore mix

- NICE CXone: unified routing, real-time dashboards
- TSYS TS2 / FDS / Avaya AAEP (Day-1 continuity)
- Fraud ML auto-decisioning (0% → 55%)
- RPA case workflows, auto call-summarization
- LLM chat solution and agent assist overlays
- Biometric voice authentication
- STP disputes and auto-scoring models
- Cognizant AI180° self-optimizing operations

Glass-box governance / zero-disruption transition

 © 2026 Cognizant

Our AI-driven CX intervention engine

Ingest and synthesize data across 60 issuer clients to identify, prioritize, and deliver AI interventions across Voice, IVR, Fraud, Disputes, and Digital self-service channels — powered by NICE CXone and Cognizant AI180°

01 | Ingest & harmonize

VOC + call logs + surveys + transcripts + digital signals

Unified data layer via NICE CXone

02 | AI synthesis

Uncovers insights across themes, sentiment, friction & root causes & generate synthetic personas

Sentiment + interaction analytics

03 | Opportunity map

Moments that matter + experience levers

Quantified CX + cost levers

04 | Prioritize

Value x feasibility x responsible constraints

Prioritized CX opportunities

05 | Design & prototype

Agentic micro-interactions + AI Agent behavior and UI layer design & rapid validation

Rapid prototypes + user testing

06 | Deploy & scale

Hybrid deterministic + agentic + feedback loop

Governed scaling

HOW IT WORKS

- NICE CXone unifies Voice, Chat, SMS, IVR into a single data stream for AI analysis to generate insights
- Dynamic orchestration routes between deterministic & generative based on confidence
- AI180° feedback loop: auto-scoring, sentiment analytics, SLA tracking across all towers
- Fraud ML auto-decisioning trained on FDS case data; human-in-loop for regulated decisions
- Rapid prototype + AI-enabled user testing to refine interventions before build
- 3-phase rollout: Stabilize (Y1) → Automate & expand (Y1–Y3) → Optimize & scale (Y3–Y5)

INDICATIVE FIS INTERVENTIONS

IVR containment 73→85% • Fraud ML auto-decisioning 0→55% • Gen AI Agent Assist • STP disputes • Conversational IVR • Accent neutralization

Outputs (60 issuers × 16 towers)

Prioritized CX interventions • NICE CXone integration blueprint • Dialog flows + intents • AI assistants (voice + chat)

People, Location and Transition Solution

- Workforce Rebadging
- Location strategy
- Waved approach to Client Migration

 © 2026 Cognizant

Workforce Rebadging Proposal

REBADGING RATIONALE

Day 1 commitment: ~1,000 FTEs rebadged on transition

01 End-client restrictions

Select clients contractually prohibit offshore or third-party staffing changes, requiring direct employee continuity from Day 1.

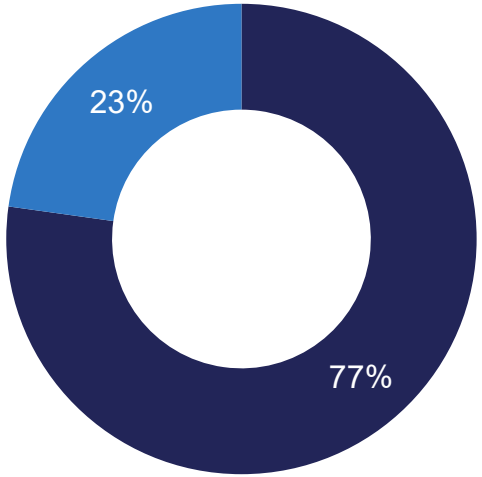
02 Regulatory obligations

UK TUPE (769 EMEA FTEs) mandates automatic transfer; US FDCPA & German BaFin data residency further restrict staff mobility.

03 Local operational footprint

Bureau, scanning & imaging functions are explicitly listed as onsite-only in scope — offshore substitution is non-viable.

STAFFING MIX BY REGION



UK / EMEA
769 FTEs
77%

United States
227 FTEs
23%

Proven expertise : Our rebadging credentials and impact

Successfully transitioned **55,000+ employees globally** into Cognizant across multiple programs

95%+ offer acceptance rate worldwide, demonstrating strong employee trust and value proposition

80%+ retention rate after 2 years, indicating sustained engagement post-transition

Dedicated, experienced global transition team managing end-to-end people transition with minimal disruption

© 2026 Cognizant

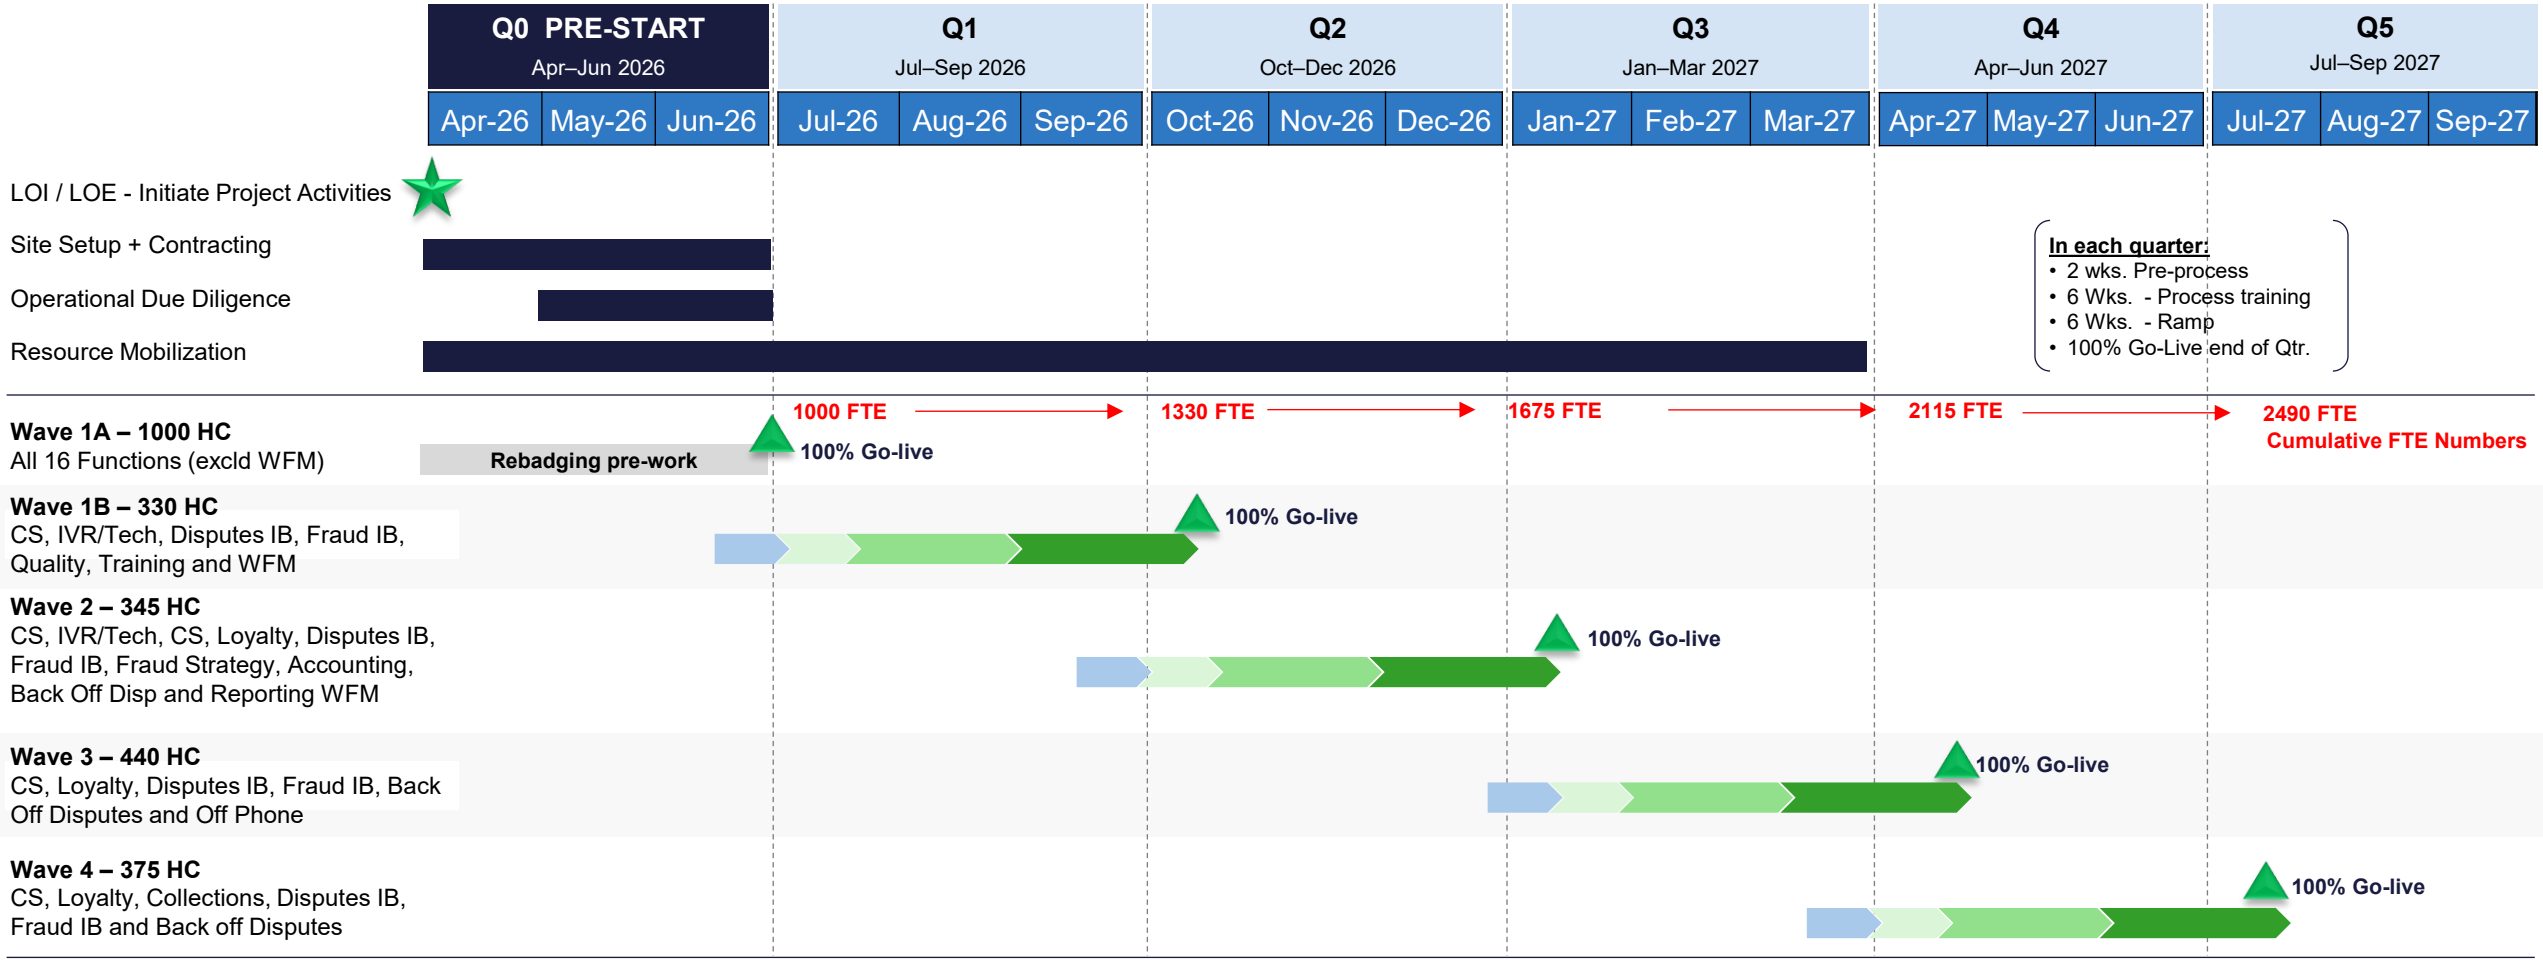
Migration Wave Timing & Sequencing

Cognizant recommends rebadging ~40% of TMS staff in-location - balancing institutional knowledge with speed of transition.



Assumptions

- Timelines will be jointly reviewed & finalized during workshop sessions
- 188 FTE / 4 Clients – De-converting remain at FIS
- Process Training / virtual training / certifications to be conducted by FIS trainers
- FIS trainer / SME support required during training & ramp period

Mobilization (2wks) · **Pre-process / Access Provisioning (2wks)** · **Process Training (6 wks.)** · **Ramp-up (6 wks.)** · **100% Go-live**

Case Study: E2E ownership of business operations and tech modernization for a leading Life and Retirement provider in US

2+ Years
Contact Center Engagement

650+
Retirement & income solutions contact center

79+
Metrics Green

2
Delivery locations – Philippines and Costa Rica

~80Mn+
Cost Savings over the contract period of 7 years

Key Challenges

- Rigid tech landscape and operating model was a hindrance which showed on the key metrics like NPS scores and dip in Sales
- Lack of single source of truth to give their clients intelligent insights in order for them accurate financial decisions.
- Digital first approach to enhance service experience
- Future ready platform allowing scale and launch of new products
- Fragmented systems and processes to support – both internal and external clients

Our Solution Approach

- Providing end to end modernized contact center services including agency management, new business, policy servicing to claims.
- Consolidated a multi-region captive driven delivery center to a near-shore and offshore solution thereby reducing the overall cost of ownership
- Modernized their contact center operations by revamping tech and operations to improve key business KPI's such as TAT, NPS and CSI
- Implement Cognizant's GenAI accelerator to assist contact center staff to be able to interact with customers and add value to each conversation

Business Benefits

30% - 50%
Reduction in Cold Transfers

40% - 50%
automation of live agent led interactions

20% - 30%
Improvement of Mobile App adoption

10% - 15%
Improvement in agent efficiency
