EXL's response to **FIS** Managed Services Partnership RFP

March 27, 2026

Dear FIS team

Our commitment to you and to your employees

Chairman & Chief Executive Officer

EXL

Thank you for the opportunity to participate in the **FIS Managed Services Partnership RFP**. We deeply value our long-standing **partnership with FIS** and view this initiative as a natural extension of our collaboration. It aligns with our strategic vision to expand our operations footprint within BFSI.

We began our journey in 1999 as a BPO company, anchored in operational excellence and deep domain knowledge. Our strength lay in managing operational processes—handling scale, complexity, and consistent performance across select industries we chose to play in: banking, insurance, and healthcare. This experience, grounded in our "Brilliant @ Basics" framework, built our reputation as trusted partners for operational performance across these industries.

Over years, we have combined our deep domain knowledge and operations experience with advanced automation, analytics and AI to deliver sizeable cost efficiencies while improving effectiveness and customer experience. Today, we are a data & AI company with strong track record of delivery excellence

The strength of our operations management heritage and existing FIS analytics partnership will mean the following:

- **Safe landing:** We will embed dedicated change management for value preservation and risk reduction, leveraging our successful playbook for transition and rebadging to maintain service quality from day one
- **Seamless operations:** Our Brilliant @ Basics operations management framework will deliver a no-surprise, tightly governed and compliant management of your operations
- **Accelerated value:** Our proven tech migration capabilities along with Data & AI credentials will enable us to infuse AI into workflows faster and deliver measurable results with greater confidence
- **Committed outcomes:** Our value commitments are grounded in real experiences—we are ready to underwrite savings promised and work with FIS to explore alternate commercial constructs
- **Feedback loops:** By embedding intelligent feedback loops into your workflows, we can enable real-time interventions and long-term improvements—each action sharpening the next to create a cycle of continuous optimization and smarter decisions at scale

This is a strategic transformation that we will drive together—shoulder to shoulder. This program has my personal sponsorship, and I will ensure sustained focus on outcomes.

FIS | EXL

CHAPTER 1:

OUR VALUE PROPOSITION

We Understand Your Vision. Here Is How We Will Deliver It.

WE KNOW THIS INDUSTRY
We deliver services to clients across banking, credit card & payment services, and fintechs, bringing a deep understanding of your customers' challenges and the regulatory landscape you operate in.

REBADGE, CLIENT MIGRATION & TRANSITION
North America rebadged to de-risk, with voice strategically moved to Pune & Noida and back office to Kochi. EMEA fully rebadged and run in-country.

TECHNOLOGY MODERNIZATION
Full migration from Avaya to NICE CXone. Wave-gated, no big-bang. Every integration built, tested, and signed off before any client goes live.

AI AND PRODUCTIVITY
Continuous Improvement embedded. AI overlays deployed in phased manner. Measurable gains embedded into steady-state operations, not treated as a future promise.

BEYOND OUTCOMES – WE HELP YOU GROW
Industry benchmarking on fraud detection rates, dispute resolution cycles, and cardholder experience. Insights that can help FIS clients unlock more value.

FLEXIBLE COMMERCIAL MODEL
Currently, 30% of clients are on TBP/OBP, while 70% are on an effort-based (FTE) model.

GUARANTEED COMMITTMENTS
Governed jointly, measured transparently, and contractually accountable from day one through steady state.

500+ EXL Banking & FS Clients	**30,000+** EXL BFSI professionals
60+ Clients migrated with Zero Disruption	**9** Months for end-to-end transition for NA programs
100% Sites on NICE CXone	**12** months for migration
Additional 8%-10% Voice Deflection via IVR	**15%-20%** AHT Reduction
10-15% Lower Losses	**5-10%** CSAT improvement
TBP / OBP Model explored jointly post steady state	**Gainshare** Beyond committed FTE reduction
$364.2 M Net Savings Over 5 Years	**44 - 46%** FTE reduction delivered within 30 months

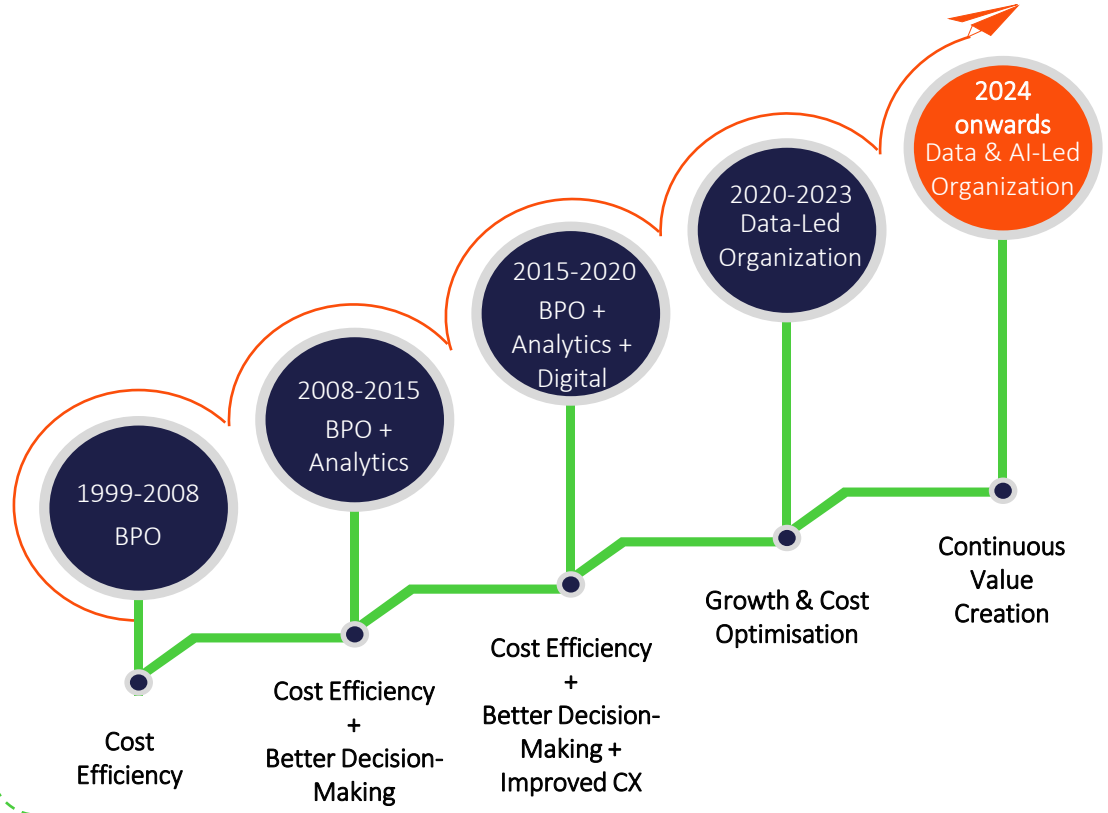
Right Expertise & Scale: We combine domain, data and AI to transform workflows for our clients with speed

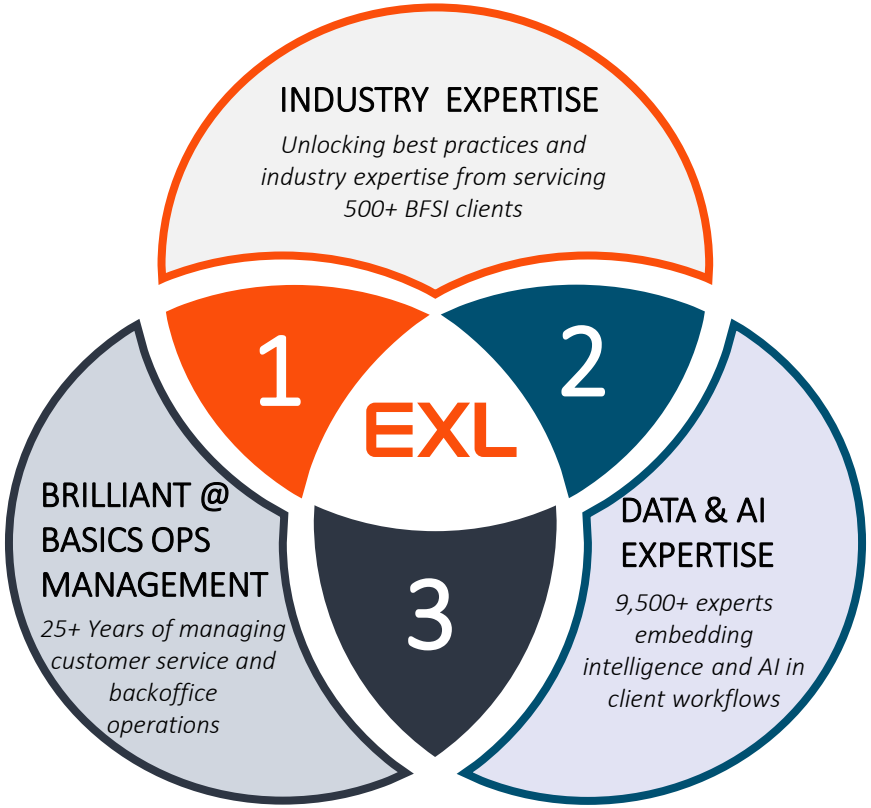
$2.27 – $2.32B	56%	63K+	85+	10+	200+
2026 Revenue Guidance	Revenue is Data & AI-led	Domain, data, analytics and digital professionals	Client NPS | Last 5 years Average	Years of Avg Client Tenure	AI Agents deployed

EXL Evolution



What it means for our Clients

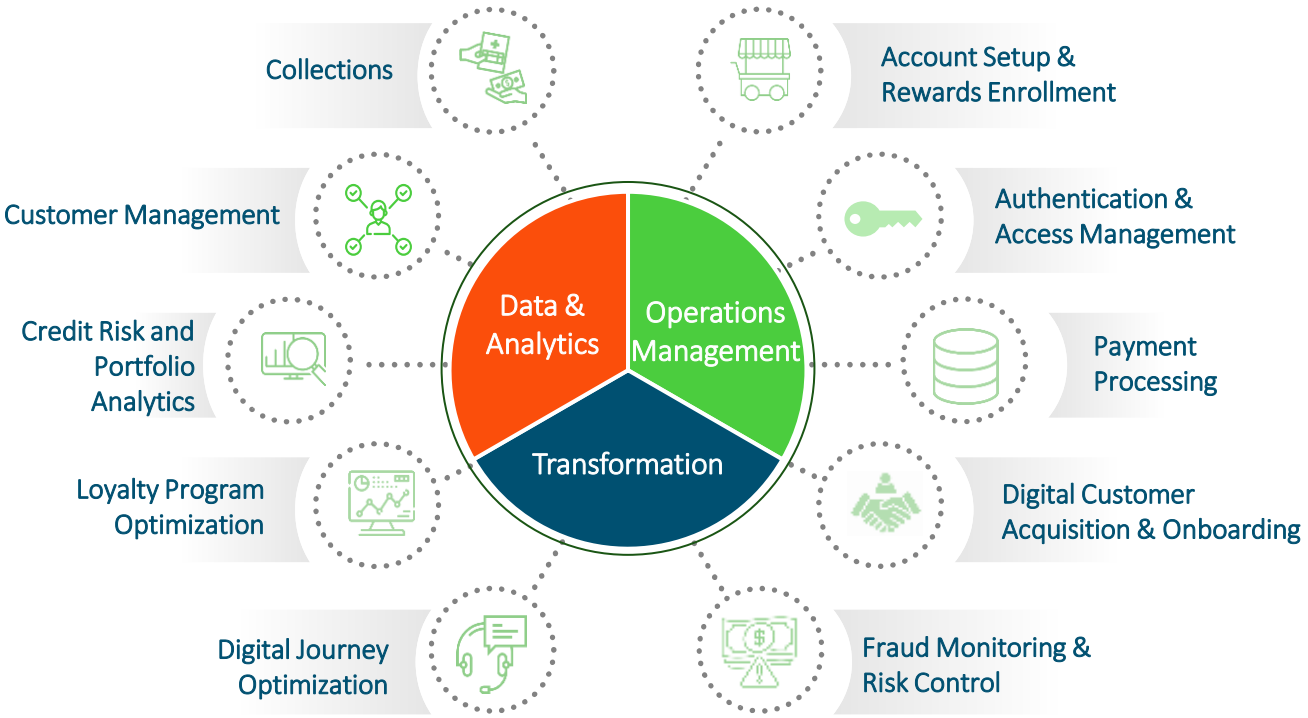
Integrated operations - service, back office, data, analytics & AI working as one closed loop



©2026 ExlService Holdings, Inc. All rights reserved.

Strong Domain Expertise : We solve business challenges across the value chain through our end-to-end capabilities within Banking

Our Experience across Banking clients



10x ROI	5-10%	$1.3Bn+	10B+	25+
Through Spend Growth & Loss Saves	NPS Improvement	Fraud Loss prevented in a year	Delinquent Debt Treated	Banking Solutions

What advantages does it bring for FIS

1 Our Client Portfolio (significant overlap with your customers)

- 9 of the top 10 US banks
- 13 of the top 20 Global banks
- 5 of the top 6 US Payment networks
- 50+ Fintech, Credit Unions

2 ..Combined With Our Strong Capabilities

- Digital Lending & Onboarding
- CX Transformation
- Risk, Product and Marketing Analytics
- Integrated Fraud
- Digital Collections with Voice AI

Data Management, Advanced Analytics, AI, Automation and Agentic AI

3 .. And Established Partnership With FIS

- Culturally aligned, operating at your pace and precision
- Existing MSA enables friction-less onboarding
- Existing work with **CMO org** enabling deep understanding of FIS data and processes

..ENABLES US TO*...

RETAIN & DEEPEN
Existing FIS Clients

- Reduce Fraud Loss
- Increase NPS & Wallet Share
- Better Collection Efficiency

ACQUIRE & SCALE
New Client Growth for FIS

- Accelerate Go-to-Market
- Sales & Solutioning Support
- Bundled Ops + Value added services

*Please refer to Annexure on how we can add more value for your clients

Our Technology and AI capabilities are aligned to your requirements

Our Design Principles for FIS

- Complete Ownership and Minimal External dependencies
- Seamless, Phased Technology Transition with minimal disruption
- Responsible deployment within FIS Environment
- Synergize End to End Front-to-back-Office value chain
- Maximize return on FIS's Existing Technology Investments
- AI Led Transformation for Scalable Productivity

AI-led Transformation– Domain, Tech, Data, Digital Advisory and Implementation

Infrastructure Migration & Tech Investment Maximization

- CCaaS Migration & Modernization
- Develop & Deploy Cloud-native AI Solutions integrated with core workflows & Business Applications

'AI-First' Customer Experience Transformation

- Designing AI-First Strategy for Customer & Agents with accelerated insights
- Agentic AI powered Virtual Assistants across Web, Voice & Chat journeys

AI-Infused Fraud, Disputes & Collections

- Specialized Fraud & Dispute AI-Agents protecting fraud loss & reducing human Intervention
- AI-led Collections & Fraud Strategies to boost revenue & productivity

Data Estate Strengthening the end-to-end Value Chain

12,000+ Data Scientists & Analytics Professionals

4,200+ Digital Consultants and Implementation Practitioners

150+ Architects (AI/ Analytics, Automation/Cloud/UX/App Dev)

1,500+ Data Management Professionals

6 Digital Innovation Centers

Supported by Strong Partnership

Advanced customer engagement

GENESYS, Amazon Lex, Google Cloud, NICE CXone, Microsoft, Five9

AI platforms & applications

whatfix, SIERRA, celonis, krisp, kore.ai, SS&C Blue Prism, UiPath

Empowering data platforms

databricks, snowflake, snapLogic, Palantir

Smart platforms and workflow solutions

salesforce, appian, Microsoft PowerApps, Power Platform, servicenow, SAP

Infrastructure & foundational models

aws, Azure, Google Cloud, NVIDIA, Microsoft Azure, OpenAI, ANTHROPIC

Regulatory & Compliance Credentials and Permissions

Security and privacy are of profound importance both to FIS and to EXL. Being an existing partner for FIS, we are aligned to your specific security and data privacy requirements

ISO 27001 – Certification Audit (every 3 years) and Surveillance Audit (Annually)

SOX 404 control testing is mandated by the Sarbanes-Oxley act, a bi-annual assessment conducted by Big-4s

PCI DSS V4.0.1 - Technical & operational controls to protect cardholder data

SSAE 18 / SOC - attestation of controls effectiveness by Big-4

ISO 22301 assuring our clients of business resiliency and disaster recovery capabilities

HITRUST - Program for healthcare client operations to compliance with HIPAA requirements

Central Information Security Team with CRISC, CISA, CISM, CISSP, CCSK, CEH and ISO27001 certifications

Information security and privacy controls

- Human resource controls
- Physical controls
- Logical controls
- Next-gen controls for remote work
- BCMS and DRMS
- CCPA/GDPR/DPA
- EXL's Responsible AI Framework

Our regulatory permissions

Collection Licenses for US

We have licenses for B2C collections from India, Philippines for US locations

FCA

EXL UK is authorized by the FCA under firm reference number (FRN) 975247

EXL India (FRN 415268) and EXL South Africa (FRN 713509) are authorized representatives of EXL UK

We are authorised by FCA to provide Debt Collection, Debt Admin and Insurance Distribution activities including adherence to operational resilience and consumer duty

Select Client Engagements

Large-scale FTE Migration > 1000 FTEs

Fortune 50 Financial Service Provider
NA contact center for one of the largest financial institution – Customer and back-office services across three delivery locations

THE CHALLENGE
Migrating 1100+ resources distributed across multiple functions and locations with limited visibility into forecasted volume, lack of process flows, non standardized operating framework and inconsistent reporting metrics

HOW WE RESOLVED IT
Defined and documented control framework, created E2E process maps (upstream → core → downstream dependencies), created a single source of truth for reporting

1100+	14	100%
FTEs transitioned in ~11 months	different platforms utilized for transaction processing	Standardized Operating process and metrics

Complex Transition In Regulated Environment

Global Systematically Important Bank (GSIB)
Delivering Treasury Services and Transfer Agency capabilities for a large custodian bank

THE CHALLENGE
Complex multi-client transition with diverse volumes, unique requirements, and strict SLA continuity. Material contract change (offshoring + outsourcing) requiring strong governance, planning, and client assurance

HOW WE RESOLVED IT
Client-specific delivery through cohorts, skill alignment, and compliance. Scaled efficiency via cross-skilling, shared capabilities, and flexible staffing

70+	460+	CCaaS
Clients migrated	FTEs transitioned in ~12 months	Migration in parallel during transition

Compliance-Centric Client Migration

FinTech Consumer Lending & Banking Provider
Collections, Customer Service, Fraud, and Disputes

THE CHALLENGE
High regulatory intensity and complex handoffs elevate control-break risk, while audit-sensitive obligations, customer harm exposure, and queue volatility drive SLA instability during transition

HOW WE RESOLVED IT
Compliance embedded by design through SOP and script integration, reinforced by joint QA calibration and pre–go-live validation, with real-time controls and monitoring ensuring audit readiness and zero-tolerance adherence.

600+	Below 30 Days	>95%
FTEs transitioned	Complaint Rate	QA Compliance pass rate across Fraud and Dispute

CHAPTER 2:

OUR BLUEPRINT FOR EXECUTION

Our execution has been recognized by industry as well as our clients

Winner IDC FinTech Real Results 2025 for Lending Transformation	**Star Performer** Banking Operations – Services PEAK Matrix 2025	**Best New Partner of the Year** Awarded by Genesys, 2026	**Advanced Technology Partner of the Year** Awarded by Nvidia at the Nvidia Partner Network Awards, 2026
Named in the Gartner® Market Guide for Generative AI Services for Banking 2025	**AI/ML Market Disruptor of the Year** Awarded by AWS at the annual AWS AI Conclave, 2026	**Market Leader** HFS Horizon "Customer Experience Service Providers 2024	**Leader** In Everest Group Customer Experience (CX) Services 2025

Gold Stevie Award for Best Use of AI Integration in Contact Centers

Two Models Evaluated for Target Operating Model

We evaluated two models against various dimensions and present our PoV below. We have priced Option 1 as the base case. Our recommendation is Option 2 that delivers labor arbitrage from Day 1, meets your strategic outcomes, and builds a platform for long-term growth.

	OPTION 1: REBADGING MODEL | Priced	OPTION 2: DAY 1 OUTSOURCING MODEL | Recommended
Approach	Rebadge NA and PHP sites, then phase transition to India | EMEA rebadged | Transformation ownership with EXL for both NA & EMEA	NA offshored to India from Day 1 | EMEA fully retained by FIS in-country, no rebadging | Transformation ownership with EXL for both NA & EMEA
Location	NA sites (incl. PHP) retained until India transition completes | EMEA resources rebadged to EXL	NA → transition to Pune and Noida (Voice), Kochi (Back-Office) | EMEA → Milton Keynes, Hamburg, Barneveld fully in-country and retained
Cost	High-cost locations maintained in NA through transition; Labor arbitrage deferred | EMEA cost reduces through transformation	Labor arbitrage from Day 1. Savings compound as India delivery replaces high-cost NA locations | EMEA cost reduces through transformation
Ease of Change	EMEA rebadge | Double NA change management (First rebadge, then India transition)	NA requires concentrated upfront effort - India ramp, dual-run, client comms | EMEA stays with FIS
Risk	Lower short-term operational risk with rebadging	Higher transition risk for NA, however, managed and mitigated by phased wave design, dual-run periods, and joint governance | No Risk for EMEA (stays with FIS)
Speed to Value	Savings modest in Years 1 due to dual cost burden of rebadging and deferred India transition.	Significantly higher savings ceiling sustained through contract term.

Poor | Below Avg | Moderate | Good | Excellent

©2026 ExlService Holdings, Inc. All rights reserved.

Overall Five-Year Roadmap

We carefully evaluated your requirements and came up with a pragmatic yet flexible plan over the five-years to safely land and transform your operations

Key design principles

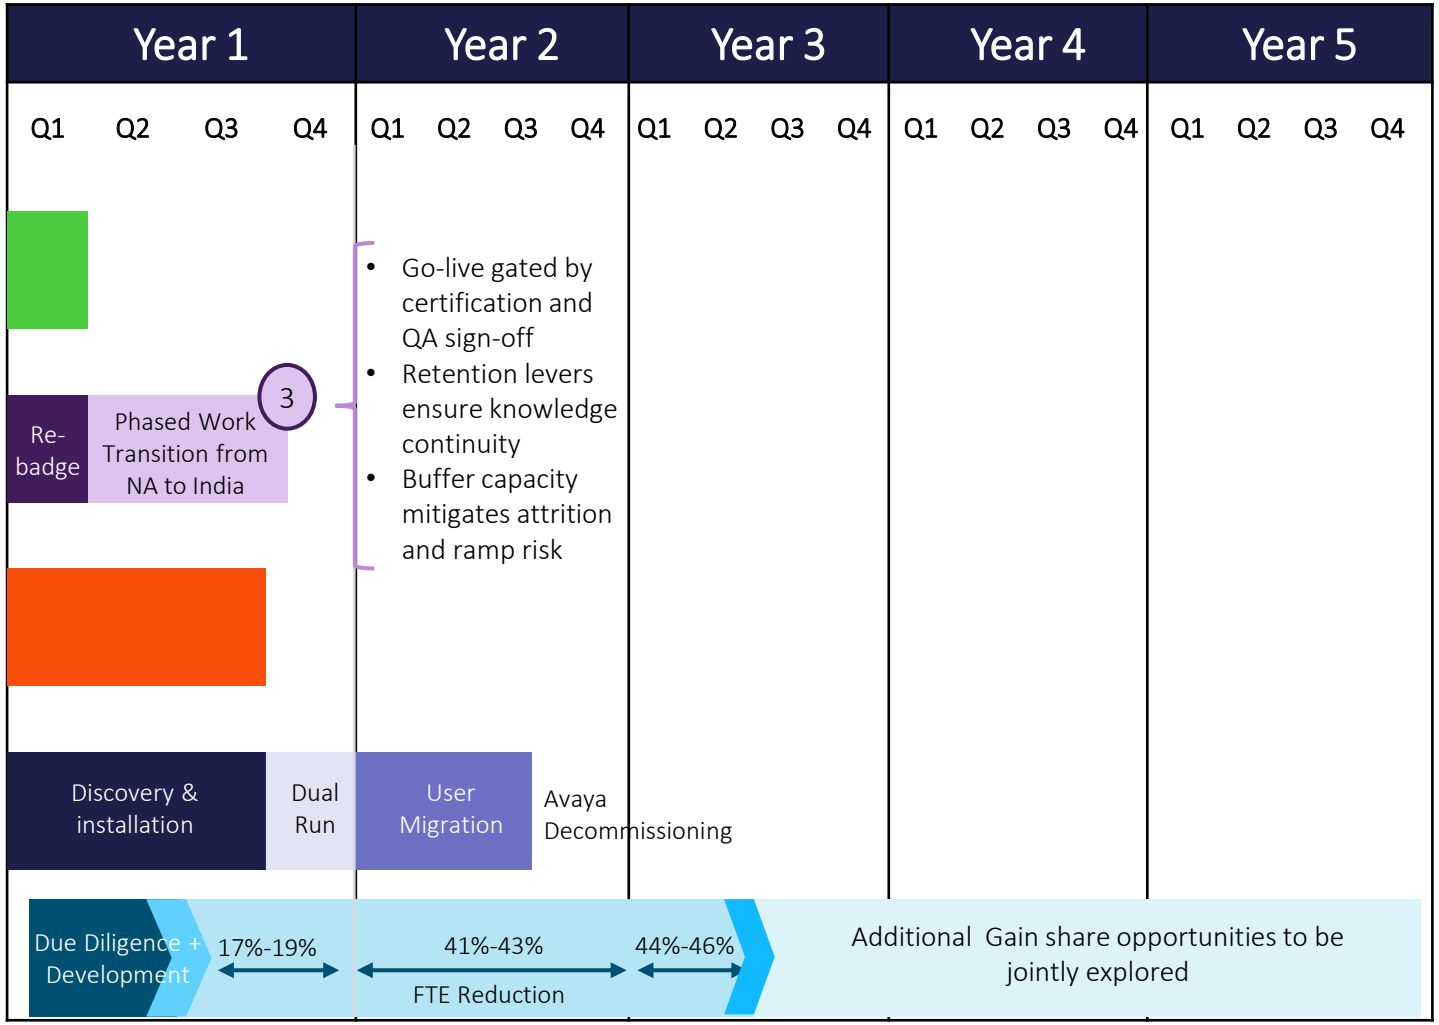
EMEA - Rebadging 01
- EMEA: Rebadged and retained in-country, with no work movement—focused on in-place transformation

NA – Rebadging 01
- NA: Rebadged and transitioned to India through phased waves

Client Migration 02
- Start with low-complexity clients; defer high-value clients
- Complexity-based cohort drives migration sequencing
- Cohort-based migration with dual-run and SLA protection

Technology Migration 04
- No operational disruptions
- Dual run of Nice CX One and Avaya for BCP

Productivity & AI Overlay 05
- Maximize existing FIS tech investments
- Responsible deployment within FIS Environment



©2026 ExlService Holdings, Inc. All rights reserved.

Workforce Transition and Rebadging Strategy

We have strong experience of rebadging over 7,500+ resources with a great track-record

Our Approach to People Integration, TUPE Transfers, and Rebadging/ TUPE

- **Strong Employee value Proposition** by Aligning roles & C&B
- **Communication blitz** to drive Engagement & Clarity through Leadership, 1:1s, and Interactive Updates
- **Seamless onboarding** for smooth transition, Uninterrupted Pay & Benefits with Digital, Location-Agnostic Onboarding
- Transparent & timely **query resolution** at all stage
- **Cultural alignment** by Cultural Alignment via 0–100 Day Roadmap: Learning, Celebrations, Leadership Connects & R&R Milestones

High-Level Timeline: Rebadging & TUPE - NA (1,450) & EMEA (1,228)

Month 1
- Announcement
- Consent & Employee Data Collection
- Build Offer T&Cs collaboratively
- Communication & Change Planning

Month 2
- Consultation Meetings
- FIS Verifies Offers Data
- Offer Rollout & Background Verification

Month 3
- Offer rollout
- **Retention bonus to key employees**
- Launch virtual HR desk
- EXL familiarization session
- Track offer acceptance

NA (1,450): *3-Month Rebadging Program Timeline* → US-to-India Resource Transition Post-Rebadging, Phased over 9 Months

EMEA (1,228): *3-Month TUPE transfer Program Timeline* → Steady State on EXL Payrolls Post-Onboarding

Month 1
- FIS to share high-level T&Cs with EXL
- Proceed with public/internal announcements

Month 2
- **Collective TUPE consultation** by FIS
- Share transfer details & timelines
- Address employee questions & feedback
- EXL issues measures letter to FIS

Month 3
- EXL presents measures to staff collectively
- FIS refreshes TUPE data
- EXL conducts **individual TUPE consultations** & requests staff to revalidate data
- Final TUPE transfer
- EXL Onboarding

Select Rebadging Experience

Fortune 100 US Specialty Insurance Provider

400+ FTEs supporting Insurance Operations and Insurance F&A

Global Travel Management organization

2,000+ FTEs for travel and card support services

FCA regulated Retailer

600+ FTEs across voice and back-office operations

Leading Global Insurance & Financial Services Provider

400+ FTEs providing underwriting Support and Claims transitioned

Fortune 100 US Health Insurer

400+ FTEs moved over 9 months

©2026 ExlService Holdings, Inc. All rights reserved.

Delivery Footprint and Facility Transition

The Principle: FIS owns lease. We own the people, the operations, and the transformation. NA transitions to India wave by wave. EMEA remains in-country.

NORTH AMERICA: STRATEGIC MIGRATION

NORTH AMERICA → INDIA

- Columbus, GA (US)
- Sudbury (Canada)
- Manila (Philippines)

Exit: Month 9

EXL INDIA*

Pune & Noida
(VOICE – Augmented with AI Accent Neutralization)

Kochi
(BACKOFFICE)

EMEA: ANCHORED IN-COUNTRY OPERATIONS

EMEA → RETAINED IN-COUNTRY

Milton Keynes
Primary UK hub
Long-term

Knaresborough
UK delivery hub
Long-term

Hamburg
Hub for German Language
Long-term

Barneveld
Netherlands hub for European Languages
Long-term

York
UK Disaster Recovery Site as per client contracts
DR Only

Key Assumptions

Lease Management
FIS retains all lease obligations globally

Zero Infrastructure Wait
EXL India delivery leverages existing Pune, Noida, and Kochi sites. No new setup required.

Dual-Run Safety Net
Parallel operations built into ever wave. No NA site exits before India steady state is confirmed.

Flexibility
Columbus and Sudbury remain open if any client requires onshore presence. Potential to look at nearshore / offshore options for EMEA if clients permit.

India is our primary delivery location for FIS - global hub for BFSI contact center and back-office operations, with deep language talent across English, French, Spanish, and Portuguese. Where clients require an alternative, the Philippines remains available - EXL operates 14,000+ resources there serving global clients today. For EMEA clients, if permitted, we can explore our European Centers in Bulgaria and Romania.

©2026 ExlService Holdings, Inc. All rights reserved.

Phased, Risk-Back Migration Enables Controlled Scale While Protecting Client Outcomes

01 Cohort Plotted Based on EXL Experience

- Cohorts designed leveraging EXL's proven delivery across comparable clients and KPI-led constructs

02 Weeks 1–9 are non-negotiable setup time — not a delay[1]

- Client approval to be secured by FIS prior to migration
- Training begins Week 10 with full environment readiness

03 Revenue tier = wave entry rule. Higher revenue enters last

- $100K–$1M clients onboard at Week 10 with minimal volume exposure
- Dedicated clients transitioned after stabilization of earlier cohorts

04 Within every cohort, Phase 1 always goes first — by design

- Phase-first launch: Off-Phone & Accounting lead each cohort
- Followed by Customer Service and high complexity – Fraud Outbound last

05 Intentional scope exclusion

- Scope exclusion: Five clients removed due to zero projected revenue
- Phased alignment: NA-2 excludes Phase 4 based on service scope

REVENUE BAND & CLIENT GROUP	Wk 10[1] $100K–$1M	Wk 11	Wk 12 $1M–$5M	Wk 13	Wk 14 $5M–$15M	Wk 15	Wk 16 Dedicated Clients	Wk 17	Wk 18	Wk 19	Wk 20	Wk 21	Wk 22	Wk 23
$100K–$1M First cohort · ~38 clients ▶ Wk 10	Ph.1 Accounting (4) · Off Phone (12)		Ph.2 Customer Svc (11) · Fraud (9) · Disputes (9)		Ph.3 Collections (1) · Loyalty (9)		Ph.4 BO Disputes (12) · Fraud Outbound (8)							
$1M–$5M Second cohort · ~11 clients ▶ Wk 12			Ph.1 Accounting (2) · Off Phone (8)		Ph.2 Customer Svc (5) · Fraud (9) · Disputes (7)		Ph.3 Collections (2) · Loyalty (3)		Ph.4 BO Disputes (7) · Fraud Outbound (9)					
$5M–$15M Third cohort · ~1 client (NA-2) ▶ Wk 14					Ph.1 Off Phone (1)		Ph.2 Cust. Svc (1) · Fraud (1)· Disputes		Ph.3 BO Disputes (1) · Fraud Outbound (1)		No Ph.4 as NA-2 doesn't do Accounting, Collections and Loyalty			
Dedicated Clients Fourth cohort · ~4 clients ▶ Wk 16							Ph.1 Accounting (2) · Off Phone (4)		Ph.2 Customer Svc (4) · Fraud (4) · Disputes (4)		Ph.3 Collections (1) · Loyalty (4)		Ph.4 BO Disputes (4) · Fraud Outbound (4)	

- **No EMEA clients'** migrations: BAU operations continue post-rebadging
- Design principles to be further aligned and refined in partnership with FIS during solutioning
- IVR excluded across all clients (part of Tech migration)

We have provided details of Client Migration responsibilities across FIS and EXL in Annexure

©2026 ExlService Holdings, Inc. All rights reserved.

Post NA rebadging, phased transition in India across all cohorts completed within 9 months

M1	M2	M3	M4	M5	M6	M7	M8	M9

Program Level Activities for Set-up to transition work to India from NA

- 4 Weeks — Contract Execution
- 9 Weeks — Solutioning / Due-diligence
- 9 Weeks — Infrastructure and Technology Readiness
- 9 Weeks — Rebadging NA

$100K–$1M
First cohort · ~38 clients
▶ Wk 10

- **Phase 1:** Accounting (4) · Off Phone (12)
- **Phase 2:** Cust. Svc (11) · Fraud (9) · Disputes (9)
- **Phase 3:** Collections (1) · Loyalty (9)
- **Phase 4:** BO Disputes (12) · Fraud Outbound (8)

$1M–$5M
Second cohort · ~11 clients
▶ Wk 12

- **Phase 1:** Accounting (2) · Off Phone (8)
- **Phase 2:** Cust. Svc (5) · Fraud (9) · Disputes (7)
- **Phase 3:** Collections (2) · Loyalty (3)
- **Phase 4:** BO Disputes (7) · Fraud Outbound (9)

$5M–$15M
Third cohort · ~1 client (NA-2)
▶ Wk 14

- **Phase 1:** Off Phone (1)
- **Phase 2:** Cust. Svc (1) · Fraud (1)· Disputes
- **Phase 3:** BO Disputes (1) · Fraud Outbound (1)

Dedicated Clients
Fourth cohort · ~4 clients
▶ Wk 16

- **Phase 1:** Accounting (2)·Off Phone (4)
- **Phase 2:** Customer Svc (4), Fraud (4), Disputes (4)
- **Phase 3:** Collections (1) · Loyalty (4)
- **Phase 4:** BO Disputes (4) · Fraud Outbound (4)

Some of the critical alignments with FIS During Solutioning

- Training duration and delivery approach
- Ramp support model, including Quality framework
- Certification framework for resources, trainers, and quality
- Defined ramp success criteria
- BAU performance metrics and targets
- Client Permissions / Discussions

01 PROGRAM READINESS
Build the foundation before moving clients
→ Ready before committing

02 PEOPLE BEFORE PROCESS
Rebadged with a phased transition to India
→ No workforce risk on transition day

03 REVENUE-SEQUENCED ENTRY
Lower revenue first. Highest revenue last.
→ Model proven before it matters most

04 PHASED SERVICE ACTIVATION
Low complexity first. Fraud and disputes last.
→ Complexity introduced — never assumed

05 CONTROLLED FTE ABSORPTION
FTE ramp is staged. Never front-loaded.
→ Capacity built in steps

06 TECH & INFRA GATE
Infrastructure is a pre-condition — not a track.
→ Tested and signed off — or not live

©2026 ExlService Holdings, Inc. All rights reserved.

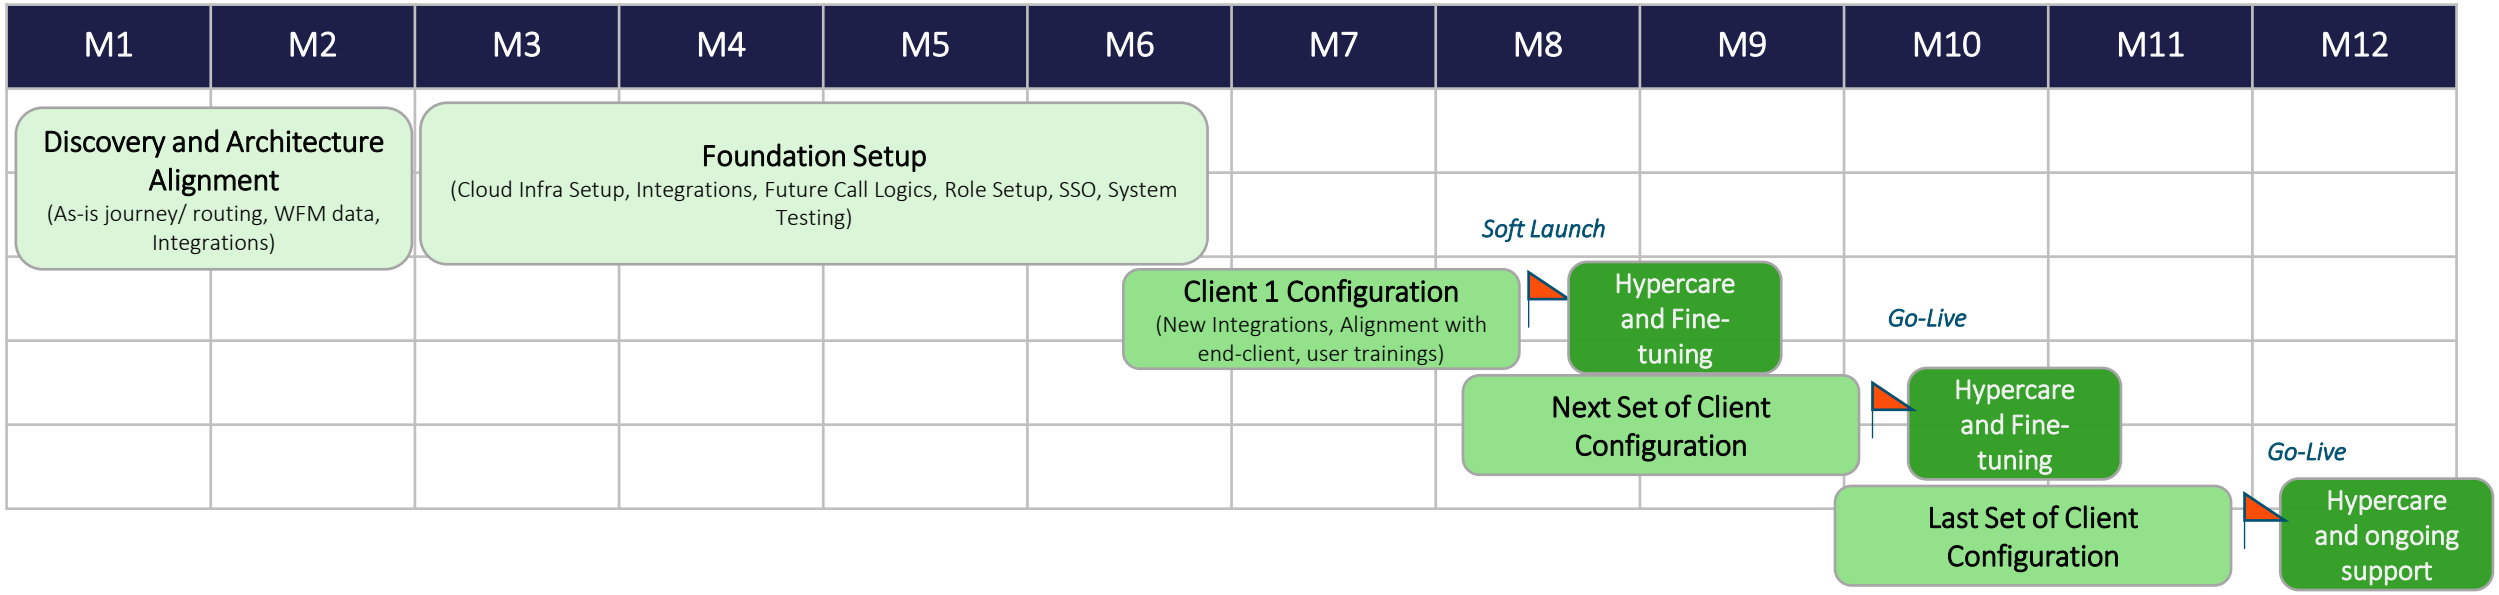
Tech (CCaaS) Modernization plan with in-built flexibility

Scope and Objectives

- Transition from the Avaya platform to **Nice CX One**, (including omni-channel routing, WFM, call recording, reporting, outbound capabilities, etc.).
- **No operational disruptions**

Design Principles and Approach

- **Data-driven discovery** and specific stakeholder sessions.
- **Setup the CCaaS foundation** in accordance with FIS technology governance and compliance standards
- **Soft launch** with an initial client to test, validation and optimization
- **Phase wise client-specific rollout plan**
- **Change Management and risk control measures**, ensuring operational readiness alongside parallel technology runs.



We have provided detailed plan along with Tech Migration responsibilities across FIS and EXL in Annexure

©2026 ExlService Holdings, Inc. All rights reserved.

Carefully curated AI Overlay to deliver measurable gains

Interaction Agent | Assist Agent | Extraction Agent | Processing Agent | Insights Agent | Human in the loop (Exceptions + Fallouts)

Consumer	No Touch	High Touch- Human	Journeys	Front Office		Back Office		Impact (Key Metrics)
Customer	Consumers calling directly; Digital Assets; Website; Self-service Enhancement (Microsoft); App	NICE CXone; NICE CXone; Messaging	Customer Services	Accent Neutralization	Customer intent identification, preference, enquiries, resolution; Proactive nudges, Nest Best Actions	Automated Audit +	Customer, KYC, hand filled forms, emails; Updating of customer records, recon, issuance, preference setup	Automated Audit +	Containment Improvement: 74 to 81% NA; 39 to 54% EMEA
			Fraud		Fraud call intake, authentication & customer intent recognition; Fraud questionnaire		Transaction pattern, profile history, account changes, link analysis; Card lock, fraud tagging, customer notification		~10%-15% Fraud Loss Reduction
			Dispute		Dispute call intake, authentication, customer intent recognition, document gathering; Dispute questionnaire		Documents, transaction pattern, past dispute history, card compromise markers Approve/Decline disputes, provisional to permanent credit, customer notifications		~5%-10% Improved Recovery Rate
			*Collections		Customer Outreach, Negotiation, Promise to pay; Transaction validation		Judgement, bankruptcy, pay slips; Payment plan update, settlement agreements, forbearance		~5% Improved Promise to Pay conversion

Predictive analytics, risk scoring, dispute classification

Alignment to FIS tech stack: NICE CXone, Microsoft, tableau from Salesforce, NUTANIX, connect, cisco, e-OSCAR, amadeus, LexisNexis, innovis, Contact Center Compliance

*Not included in phase 1 of AI Overlay because of small scope

Impact through our Continuous Improvement and AI Overlay

Intelligent, Scalable, Data-Driven Execution with Committed Outcomes beyond Cost Reduction

20%-21% FTE REDUCTION

Committed & Guaranteed

FIS SUPPORT : MINIMAL

1. SIMPLIFY & OPTIMIZE

- Process standardization (Customer Service, Fraud, Disputes, etc.)
- Consolidation benefits / Span Benefits through reduction in Quality, WFM, Training, Accounting, Reporting and Management FTEs
- Exception root cause elimination
- Control point redesign

2. LC/NC AUTOMATION + AI ACCELERATORS

- Robotics Process Automation
- MiAI Training Simulator
- Accent neutralization and noise cancellation for front-office operations
- Performance & Insights dashboards

+24%-25% UPSIDE

Reaching 44%-46% FTE reduction

FIS SUPPORT : LIGHT TOUCH COLLABORATION*

3. ADVANCED AUTOMATION & AGENTIC AI

- **Interaction Agent (Powered by Transform.CX)** – Manage customer communication and self-service channels e,g, Fraud & Dispute Intake, Customer outreach for collections
- **Assist Agent (Powered by EXL SmartAgentAssist.AI)** – Real-time assistance on the call/tickets
- **Extraction Agent (Powered by EXL Xtrakto.AI™)**– Intelligent processing of various documents e.g, Customer info, Transaction details
- **Processing Agent (Enabled by EXL iBot.AI)**– Perform downstream actions
- **Audit Agent**– For automated quality audits
- **Insights Agent (Enabled by EXL CX Insight Hub)** – Provide insights on business metrics e.g, Fraud rate, Recovery rate, Dispute win rate

CSAT Improvement	SLA Improvement	Fraud Loss Reduction	Recovery Rate Improvement
8%-10%	2%-5%	10%-15%	5%-10%

POWERED BY – EXL TRANSFORMATION & CHANGE MANAGEMENT OFFICE

**Timely availability of APIs, dev/test environments, network connectivity, and SaaS deployment approvals | Governance approvals and IT PMO alignment*

Select Client Engagements: Transformation

IVR Containment using Agentic AI

Large US Fortune 50 Bank

Contact center handles 200M calls annually; 60M+ calls escalate to agents, with 25% driven by key intents, card replacement and recent transactions

WHAT WE DID

Built Agentic AI on Google Gemini for E2E call containment for 60M+ calls annually

THE CHALLENGE

High operational costs driven by manual call handling, high agent dependency, inconsistent service, and inefficient resolution

HOW WE RESOLVED IT

Deployed agentic AI to automate queries with fast, context-aware responses at scale, achieving 95%+ intent accuracy

~$45-$50M	20-30%	20-30%
Annualized Savings from residual call containment	Enhancement in call containment for residual calls	Reduction in AHT

Tech migration and transformation using Data and AI

Global Systematically Important Bank (GSIB)

1100+ agents handling ~6M contacts annually; with $80 M+ annual operating cost; Legacy ecosystem (Nice, Avaya, Nuance ID&V)

WHAT WE DID

Intent analysis & CX transformation- leveraged AI agent builder and designed AI driven containment & assist strategy

THE CHALLENGE

Fragmented systems leading to poor visibility to customer journey, High dependency on manual agent handling, low containment in IVR

HOW WE RESOLVED IT

Migrated legacy systems to Genesys cloud platform, Implemented Google AI agents for IVR containment, Deployed Agent Assist integrated with MS Dynamics, build unified CX Insights Hub

~30-35%	~15%	~5%
FTE saving by year 3	Agent efficiency improvement	NPS improvement

Fraud, Disputes & Credit Risk Management

US based Fortune 500 Bank

Fraud loss mitigation and transformation for credit/debit cards, Wires/ACH, loans as well as cheque payments- ensuring monitoring over spends of $100 Bn annually

WHAT WE DID

Mitigating fraud losses, stopping fraudulent applications by building robust strategies/models while maintaining CX

THE CHALLENGE

High credit/debit card fraud rates(~25+ bps approved fraud), high customer complaints due to false positives, manual review of models and dissatisfactory model performance

HOW WE RESOLVED IT

Developed transactional fraud mitigation model & deployed SMEs for each product, across customer lifecycle to deploy tactical + strategic rules.

~$30 M	25+	~12%
Annualized fraud savings	Models developed/ monitored annually	Reduction in fraud applications
