Why Genpact is best suited to be your value realization partner

Aligned to FIS's ways of working

- Experience of working with FIS governance, regulatory, and delivery framework
- Talent transfer of 2500+ resources with 98% offer acceptance
- Existing GTM framework to enable growth, new product launches
- Track record of delivering to commitments – e.g., 30% reduction in cost per dispute

Leader in banking operations with last-mile process intelligence

- Experience in delivering similar large-scale, complex programs, including rebadging, platform migration, and AI-led transformation, with 100% regulatory compliance
- Deep domain in customer service, risk mgmt., and banking operations – insights, benchmarks, AI assets, tech partnerships

Unique partnership approach and tailored commercial model

- Value realization roadmap with **55%** productivity delivered within 3 years
- **$23.3M** upfront investments to accelerate tech migration and client migration

Outcomes

75%*
run rate savings

68%
productivity

15-25%
reduction in AHT

20%
CX improvement – enabling retention & growth

100%
compliance adherence

What do we see as the North Star for TMS

01 Deliver structural, measurable cost-to-serve reduction

02 Consistently exceed industry benchmarks for service quality and client experience

03 Modernize onto a secure, compliant technology (TMS → FIS stack) while adding AI / digital overlays

04 Enable scalable growth of the TMS managed services portfolio

05 Operate with a compliance first and risk aligned mindset

** by end of Year 5*

An AI-first company

Genpact is a $5.1B+ professional services firm that emerged from GE Capital, and has evolved into a data and AI transformation leader

800+

clients, ~one-fourth are Global Fortune 500 companies

Deep process and industry expertise

Over 25 years of operational excellence rooted in process intelligence and domain knowledge across industries

Last-mile execution

Unique ability to address last-mile challenges with deep operational insights and exception handling

Operational excellence

Ability to set up global operations to execute at scale in highly complex environments

AI Value Studio	Delivery pods	Giga Academy	GSolution.ai
The value architecture layer, where industry-specialized experts collaborate with clients to map out their AI journey	Unique pod-based delivery structure operating as a cross-functional team	A structured program to ensure skill development to cater to the demands for advanced technologies in the market space	Reusable model hub with pre-built assets, and a responsible AI framework addressing governance and risk management

1,000+ AI models

Everest Group

Peak assessment: Leader in banking operations, risk mgmt., and customer service

NelsonHall

"Leader" in managed services, transformation in banking, intelligent automation in banking

Ecosystem, partnerships, and solutions

Azure, NVIDIA, OpenAI, Google, aws, salesforce, data iku, databricks, snowflake, Hugging Face, Meta AI, LEXOP, ANTHROP\C, MISTRAL AI, druid, LANGUAGE I/O, BEHAVIORAL SIGNALS, NiCE

FIS Savings w/ Discounts (A-B-C-D)	(46,473)	39,578	98,065	109,968	121,274	126,991	132,734	582,137
FIS Savings w/ Discounts %	*-32%*	*27%*	*64%*	*70%*	*75%*	*76%*	*77%*	*53%*

- Genpact is willing to invest in the CX/Tech Migration, and Transition charges
- We recognize that the above business case is projecting a net increase in yr. 1 for FIS. G is open to discussing investments and financial re-engineering to make the overall financials more amenable to FIS
- NiCE implementation cost of $11.5M included in the above business case

© 2026 Copyright Genpact. All Rights Reserved.

Assumptions behind the proposal: Pricing model

01 Scope & associated key hypothesis

- Below is the baseline FTE split considered for financials:

	North America			EMEA			
FTE split	**Columbus**	**Sudbury**	**Manila**	**Barneveld**	**Hamburg**	**Milton Keynes**	**Total**
Tier 1 Customer Service	415	58	37	65	129	378	**1,082**
Tier 2 Risk Mitigation	636	0	60	74	82	374	**1,225**
Back Office	247	0	0	16	26	86	**376**
Total	**1,297**	**58**	**97**	**155**	**237**	**838**	**2,683**

- Genpact assumes that Rebadge FTEs include all the support-supervision roles or bench required to run the operations independently. Hence, no additional role or headcount has been included by Genpact in solution & commercials.
- Rebadged resource decoupling timeline: ~90% for US-UK and ~70% for Canada-Netherlands-Germany offshoring to the Philippines and India by month 12 from go-live
- Committed productivity of ~68% over 7 years deal term
- FIS – TMS current Attrition / month: US Front Office: 4%; US Back office: 2.5%; Canada: 2%; UK: 1.5%; GE: 1.5%; NL: 0%

02 Key financials assumptions:

- Payment terms: 75 days with 15 days of advance billing
- Genpact charges are COLA exclusive. Charges will be adjusted for indexation from the first anniversary of the contract signature date and thereafter each anniversary, capped to below:

	US	Canada	UK	GE	NL	India	Philippines
COLA %	3%	3%	3%	3%	3%	5%	4.5%

03 Talent transfer / rebadge assumptions:

- The Rebadge costs are based on cost details shared by FIS, which will be validated during workshops and trued-up post Go-live, along with Geo wise splits within NA-EMEA regions.
- Up to the talent transfer closing date (i.e. transfer to Genpact), all liabilities, including any severance or related costs owed to rebadged employees shall be borne by FIS. Post transfer to Genpact, Rebadge resources severance cost will be borne by Genpact, for the tenure spent at Genpact only. FIS to cover severance for FIS tenure as per precedent.
- Rebadge resources (except in Philippines) will continue to operate from FIS locations and will continue to use FIS laptops & office network. Such expenses will be handled in pass-through mode. In Philippines, Rebadge resources will work from Genpact facility.

Summary of vendor costs and investments across the program

Considering that technology migration and successful client migration are key strategic priorities for the FIS-TMS business, Genpact is pleased to invest in supporting these efforts

Genpact's proposed investments

Description	Value ($M)*
Tech Migration charges (NiCE)	$ 11.5
Transition charges	$ 11.8
Total	**$ 23.3**

Additional option for FIS

If FIS decides against paying the transformation charges upfront, Genpact is prepared to back multiple transformation initiatives at no initial cost to FIS, with recovery facilitated through the gain share mechanism outlined below.

	Yr 1	Yr. 2	Yr. 3	Yr. 4	Yr. 5	Yr. 6	Yr. 7
Gain share split (FIS : G)	80% : 20%	80% : 20%	80% : 20%	90% : 10%	95% : 5%	NA	NA

Description	Value ($M)*
Transformation charges	$ 17.4
Tech Migration charges (NiCE)	$ 11.5
Transition charges	$ 11.8
Total	**$ 40.7**

*The Split of Investments is as per representation in the Pro-forma slides

Back office		Agentic solutions implementation										
		Service request processing agent, intelligent document extraction, and validation										
		AI and analytics solutions implementation										
		Including autonomous data aggregation & bureau updates, AI-powered customer outreach, AI Nudge, AI Coach, Knowledge Assist, and AI-powered payment files reconciliation										
			Workflow orchestration and automations									
Cross-stream		Lean Six Sigma initiatives										
				Y1: 8%				Y2: 39%			Y3: 55%	68% Year 7

- Transformation targeted to deliver **~68%** productivity uplift with **55%** realized in three years
- **~40%** of the target productivity to be driven by agentic solutions
- Additional AI and analytics solutions to drive incremental productivity
- Digital technology solutions to leverage existing FIS platforms where applicable
- Lean Six Sigma enabled continuous improvement, including variance reduction, load balancing, etc.

The TMS migration plan is built with a thought-through, risk-mitigated design

Design principles	Migration approach
01 **Prioritize higher-cost locations**	**Rebadging in three waves, going live sequentially** ▪ Wave 1 NA and UK (50%): Month 4/5 ▪ Wave 2 UK (remaining (50%)*: Month 7 ▪ Wave 3 Netherlands and Germany: Month 11
02 **Minimize business disruption**	**One client, one touch with 100% rebadge:** NA, Netherlands, and Germany; UK client-level segmentation
03 **Integrate curated market nuances**	**10 months baked in for the workers council** for Netherlands / Germany; Canada talent transfer through rehire
04 **Stabilize before de-coupling**	**Decouple voice to PHP and back office to India, leveraging translation tool.** Retain critical processes onshore: Fraud consulting, physical correspondence, and card destruction
05 **Embedded risk-mitigation**	**Advance seed of 10% resources through FIS Knowledge Academy:** Structured upskilling programs and proactive cross-training to ensure adequate coverage across FIS learning levels

*Client wise segregation to be done with FIS

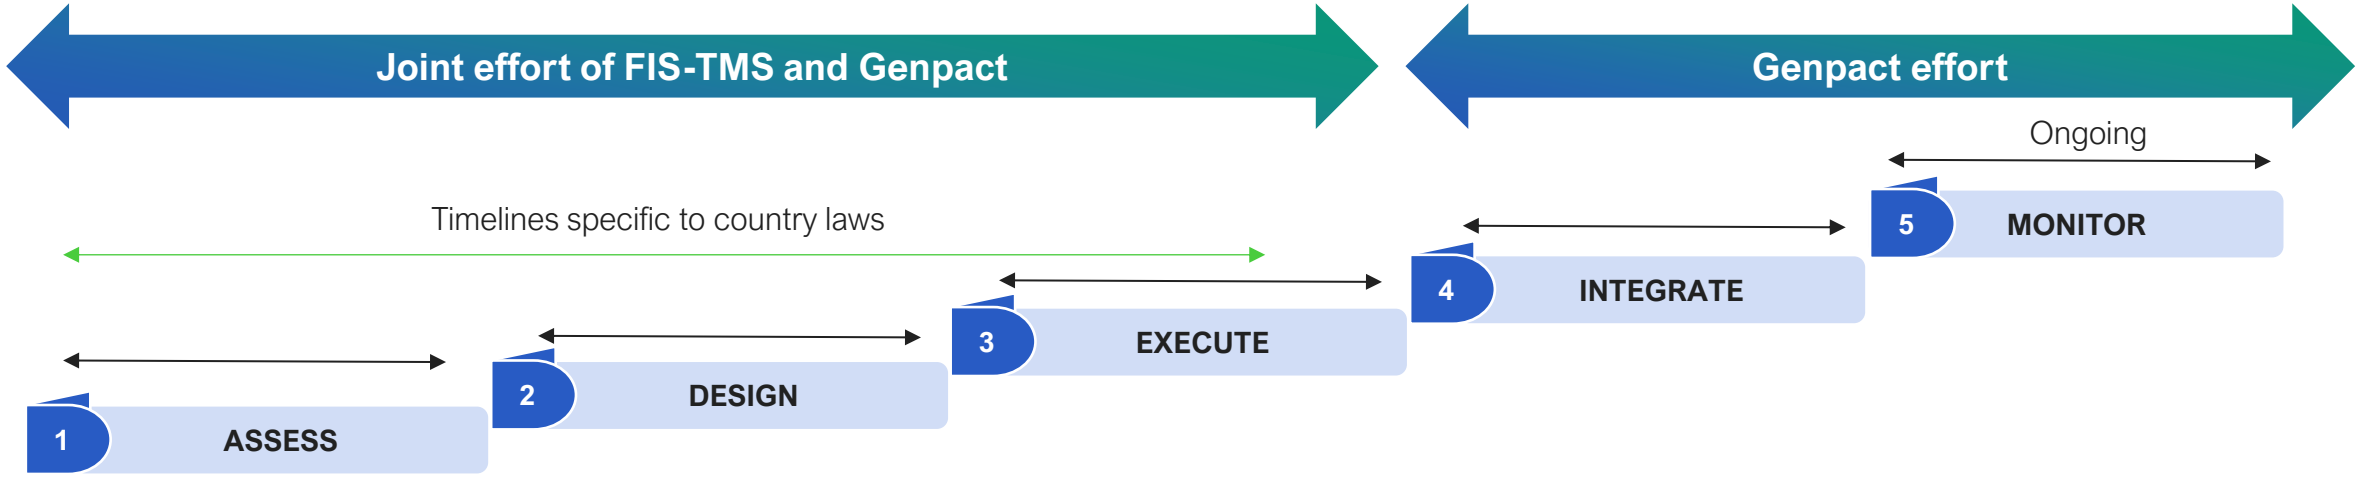
Our rebadging experience will be the foundation for people transfer

PROJECT FIS-TMS

We have proven experience with FIS in achieving 98% rebadge with 1,600+ FTEs for the US region. We have carried out 8,000+ FTE rebadge in EMEA over the last 5 years. Our approach to rebadge is structured and based on a well-defined and tested framework



Engaging hiring engine offshore from day 1 in PHP and India, including soft identification for **potential de-coupled roles ready for seeding** available from day 1

Earmarking key employees across processes with **planned retention strategy** to ensure stabilization

Key roles identified with **strong fraud / dispute experienced support system** to ensure the right talent alignment

30,000+ employees rebadged globally

95%+ offer acceptance rate

85%+ anniversary retention across all accounts

Significant **leadership time** spent on people

© 2026 Copyright Genpact. All Rights Reserved.

Autonomous agents and accelerators: we will implement multi-agent ecosystems and AI solutions well integrated within FIS technology stack

PROJECT FIS-TMS

Approach:

- Utilize AI technologies already present in the FIS ecosystem, such as NiCE CXone and AWS Connect
- Restrict new developments to only those capabilities not currently available in FIS tech or the operating ecosystem
- Only introduce accelerators with a proven track record to ensure maximum effectiveness
- Develop enterprise-level assets designed for wider application and application throughout the organization
- All agentic and AI / GenAI assets to follow established FIS processes and technology review cycles for deployment (including AI council reviews)

Business area	AI technologies	Impact metrics
Customer service	Conversational AI: Intelligent voice agents Chat agents Real-time Language Translation Agent Assist Auto QA Speech Analytics AI-powered Forecasting and Scheduling (WFM) Agent Performance Analytics	▪ >40% call containment ▪ 15-25% reduction in AHT ▪ 20% CX improvement ▪ ~3x resolution speed ▪ 100% compliance adherence
Risk mitigation (fraud and disputes)	Dispute analyst agents Fraud analyst agents Agent enablement: AI Nudge, AI Coach, Knowledge Assist Automated case narratives and notes AI-powered customer outreach	▪ >15% increase in CEX ▪ 15% FTR improvement ▪ >20% reduction in time to refund ▪ >25% reduction in dispute resolution times ▪ >98% decision accuracy
Back office 	Service request processing agents Intelligent document extraction and validation agent Autonomous data aggregation & bureau updates AI-powered customer outreach Agent enablement: AI Nudge, AI Coach, Knowledge Assist AI-powered payment files reconciliation	▪ 40-50% AHT reduction in service case handling ▪ 10-15% CX improvement ▪ ~30% STP increase ▪ ~50% reduction in duplicate and rework activities

Agentic AI / GenAI

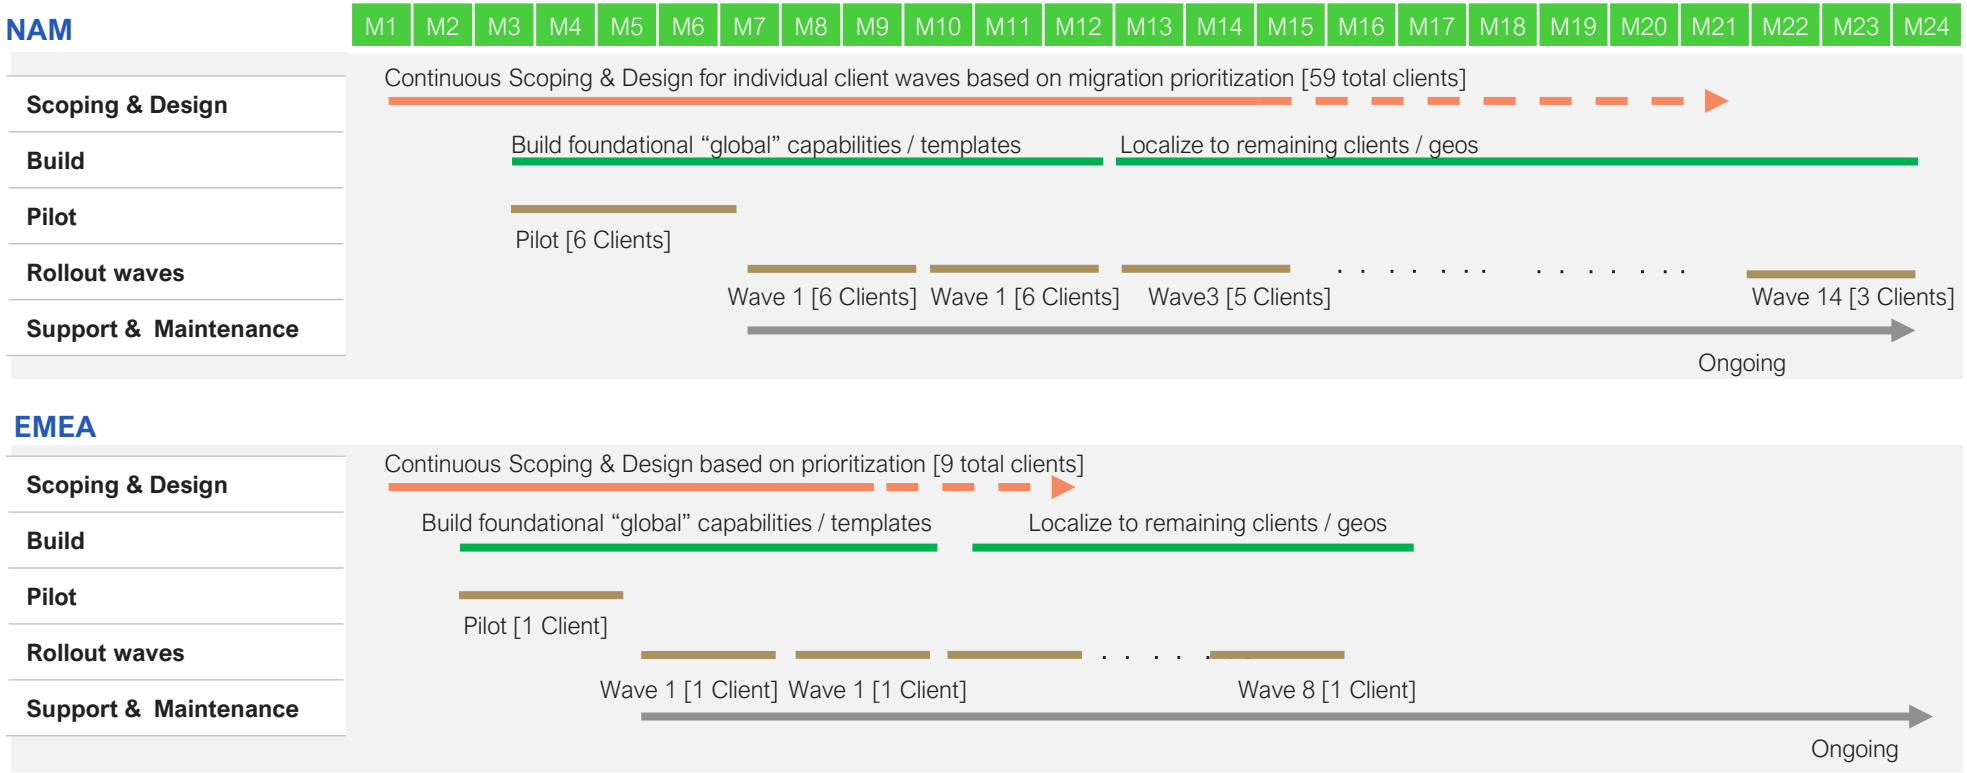
FIS | genpact

Technology Integration & Migration Plan with Timing & Sequencing

PROJECT FIS-TMS

Approach

- Migration to be performed in waves to keep complexity and risk manageable, each wave consisting of multiple customers
- Clients have been sequenced based on a combination of call volumes and “capabilities/features in scope” representing criticality, and the number of services they consume
- Waves to include combination of high and medium/low complex clients to manage efforts. The initial waves will help build foundational capabilities / templates that will help accelerate later waves (including any location required)
- Migration to leverage Genpact standard data templates with customization for FIS, multi-environment QA, accelerated roll-out and deployment



Capabilities

Foundational:

- IVR (DTMF)
- Chat
- Skill based Routing Quality Management
- Agent Desktop
- OOTB reports

Advanced:

- Chat, Virtual assistant
- Adv QM (Speech & Text Analytics)
- Agentic AI (IVA + Agent Assist)
- Auto QA
- Data Analytics & AI
- Workforce Management

© 2026 Copyright Genpact. All Rights Reserved.

Migrate platforms: Genpact will combine deep domain expertise with proven NiCE CXone migration capabilities to deliver on FIS's target-state vision

Our approach

Deploy capabilities in phases
Start with foundational capabilities (e.g., IVR / chat), then scale to advanced (e.g., agentic: IVA)

Migrate clients in waves
Controlled waves to minimize risk and disruption [NAM: 14 waves, EMEA 9]

Drive execution rigor
Global design, local delivery, including 12 months+ parallel runs and fallback readiness

Tools & accelerators
Genpact proprietary tools / methods to accelerate data mapping; pod-based delivery (Agentic factory)

Genpact – partnership: Driving multiplier value

Customer service domain depth, agentic transformations

- **30k+** customer care FTEs
- **120+** clients
- **47+** languages
- **30+** countries
- **36** AI & agentic solutions
- **1.5B+** interactions annually

+

CX transformation, CCaaS modernization, and migration with Genpact partner ecosystem

- **150+** customer service transformations
- **100k+** agents enabled
- **97%+** customer retention
- **NiCE CXone** Deep implementation expertise
- **NiCE partner** Platinum level partner
- **++ Microsoft, AWS**

© 2026 Copyright Genpact. All Rights Reserved.

List of relevant regulatory requirements and vendor verifications & experience

Genpact's compliance approach

- Genpact assesses and complies with all laws applicable to its own operations
- For client operations, regulatory requirements are identified by the client and embedded into Genpact-executed Standard Operating Procedures (SOPs)

Current permissions & registrations (in-scope markets)

- Genpact is already delivering a similar scope of work to FIS in North America; we therefore do not expect additional requirements there
- Preliminary analysis indicates no payment services permissions are required for Genpact's scope of work in the UK and EU (subject to further review)
- Genpact currently holds debt-collection licenses in the US and Canada, if relevant for the Collection process
- If relevant, Genpact holds a debt administration and debt collection permission from the FCA for consumer credit
- Collection tasks in other jurisdictions will be reviewed on a case-by-case basis, including any potential licensing or registration needs

© 2026 Copyright Genpact. All Rights Reserved.

Facilities Takeover – Proven Global Experience

Genpact has deep, repeatable experience taking over client facilities globally, based on long-term value. For the TMS program we would like to discuss specific sites and engage in a due diligence exercise at the earliest.

Our principles

- Facilities under TMS program are configurable assets for synergistic benefits, minimizing disruption for rebadged employees and reducing execution risk for FIS
- Convert to Genpact-use site and operate independently

Representative Takeover Examples

Multi Country takeover – GE 9 locations, 3000+ people across UK, Hungary, US, Mexico, India, Egypt

- Katowice – **Unilever**
- Amsterdam – Accounting Plaza
- Krakow – Accounting Plaza
- Wroclaw – BD

- Bentonville (US) – Walmart
- Danville (US) – Walgreens
- Guadalajara (Mexico)

- Mumbai – Gannett
- Madurai – Ryan Specialty

© 2026 Copyright Genpact. All Rights Reserved.

Our solution for FIS-TMS is to move to an agentic operating model

Designing to shift from human led execution to compliant human + agent orchestrated operations across the TMS lifecycle

Current FTEs Service Location

Service Areas	NA*	EMEA	Total
Tier 1 (Customer Service)	510	570	1080
Tier 2 (Risk Mitigation)	694	530	1224
Back Office	246	128	334
Total	**1450**	**1228**	**2678**

- Human-led, process-bound operations
- Rules-based automation with limited learnings
- High effort to scale and adapt
- Reactive service-driven operations
- Static controls embedded in the process

Post Geo Relocation and Transformation (7 years)

Service Areas	NA	EMEA	PHP	India	Total
Tier 1 (Customer Service)	37	77	249		363
Tier 2 (Risk Mitigation)	48	63	291		402
Back Office	19	18		89	126
Total	**104**	**158**	**540**	**89**	**891**

- 68% reduction in Headcount
- Agentic, intelligence-driven operations
- AI-led decisions with continuous learnings
- Elastic scale with marginal cost growth
- Proactive issue resolution and self-healing operations
- Controls embedded into agent logic

* includes PhP & Canada

Rules behind the pricing model for scenarios (Volume fluctuations, new scope)

Key principles to handle volume fluctuation

Regular volume forecasting: Quarterly volume forecasts to enable proactive resource planning

Volume adjustment mechanism

- Post Go-Live Baselining: Each transitioned wave will be baselined for volume, AHT, SLAs, and KPIs over ~6 months, subject to no material volume changes
- Post baselining, services will be delivered under an SLA-based fixed-fee model for the baselined volume and AHT
- For monthly volume fluctuation within +/- 10% dead-band, no change in agreed fixed fee
- For temporary increase and decrease in volume, tier-based changes in Resource Unit (RU) rates are applied
- Sustained volume changes beyond ±30% for 3 months or M&A events will be addressed via Change Control

Volume Slabs	ARC / RRC RU Rate % change
Below 70%	Change Control Procedure
70%-80%	+2%
80%-90%	+1%
90%-110%	**Dead-band**
110%-120%	-1%
120%-130%	-2%
Above 130%	Change Control Procedure

New scope pricing

- Addition in headcount/volume in the current scope will be treated as ramp-up and shall be charged using the Rate card. Other charges might get added accordingly
- All new scope (incremental services) pricing to be handled through a new Statement of Work or Change Order using the Rate Card in the price workbook.
